

## **Built-in components for masonry construction**

### **Part 2: Connectors and accessories**

AS 2699.2:2020

This Australian Standard® was prepared by BD-028, Masonry Wall Ties and Accessories. It was approved on behalf of the Council of Standards Australia on 2 June 2020.

This Standard was published on 12 June 2020.

The following are represented on Committee BD-028:

- Australasian Corrosion Association
- Australian Industry Group
- Australian Institute of Building Surveyors
- Australian Stainless Steel Development Association
- Australian Steel Institute
- Bureau of Steel Manufacturers of Australia
- Concrete Masonry Association of Australia
- Galvanizers Association of Australia
- Housing Industry Association
- Materials Australia
- Think Brick Australia
- University of Newcastle

This Standard was issued in draft form for comment as DR AS 2699.2:2019.

## Preface

This Standard was prepared by the Standards Australia Committee, BD-028, Masonry Components and Accessories, to supersede AS/NZS 2699.2—2000.

This Standard is the second part of a three-part series on masonry wall ties, connectors and accessories, and lintels and shelf angles. The series comprises the following:

AS 2699.1, *Built-in components for masonry construction, Part 1: Wall ties*

AS 2699.2, *Built-in components for masonry construction, Part 2: Connectors and accessories*

AS 2699.3, *Built-in components for masonry construction, Part 3: Lintels and shelf angles (durability requirements)*

The objective of this Standard is to provide manufacturers with specifications for corrosion resistance and tests for structural serviceability of connectors and accessories when built into masonry.

The types and spacings of connectors and accessories necessary to meet design requirements are specified in AS 3700, *Masonry structures*, and AS 4773.1, *Masonry in small buildings, Part 1: Design* and, AS 4773.2, *Masonry in small buildings, Part 2: Construction*.

The terms “normative” and “informative” are used in Standards to define the application of the appendices to which they apply. A “normative” appendix is an integral part of a Standard, whereas an “informative” appendix is only for information and guidance.

Notes to clauses in this Standard are for information and guidance only and conformance with them is not a requirement of the Standard.

*This Standard includes a commentary on some of the clauses. The commentary directly follows the relevant clause, is designated by “C” preceding the clause number and is printed in italics in a box. The commentary is for information and guidance and does not form part of the Standard.*

# Contents

<b>Preface</b> .....	<b>ii</b>
<b>Section 1 Scope and general</b> .....	<b>1</b>
1.1 Scope .....	1
1.2 Normative references .....	2
1.3 Terms and definitions .....	2
1.4 Product conformity evaluation .....	5
1.5 New technologies .....	6
<b>Section 2 Performance criteria</b> .....	<b>7</b>
2.1 Scope of section .....	7
2.2 Aim .....	7
2.3 Durability .....	7
2.3.1 General .....	7
2.3.2 Damage .....	7
2.3.3 Classification of materials .....	7
2.3.4 Durability criteria for connectors and accessories .....	7
2.3.5 Alternative materials .....	8
2.3.6 Galvanic and chemical compatibility criteria for components and fasteners .....	8
2.4 Resistance to water transfer .....	8
2.5 Embedment, movement and tolerance .....	8
2.6 Structural performance .....	9
<b>Section 3 Materials</b> .....	<b>10</b>
3.1 Material selection .....	10
3.2 Alternative materials .....	11
<b>Section 4 Identification markings</b> .....	<b>13</b>
4.1 Component marking .....	13
4.2 Package marking .....	13
<b>Section 5 Testing</b> .....	<b>14</b>
5.1 Availability of test reports .....	14
5.2 Testing and test reports .....	14
5.2.1 Minimum requirements for test reports .....	14
5.2.2 Testing of components .....	15
<b>Appendix A (normative) Method for determining the coating thickness of galvanized components</b> .....	<b>16</b>
<b>Appendix B (normative) Product conformity</b> .....	<b>19</b>
<b>Appendix C (informative) Purchasing guidelines</b> .....	<b>22</b>
<b>Appendix D (informative) Typical relationship of durability class to atmospheric corrosivity category</b> .....	<b>24</b>
<b>Appendix E (informative) Tests to identify stainless steel grades</b> .....	<b>27</b>
<b>Appendix F (normative) Structural performance test methods</b> .....	<b>29</b>
<b>Appendix G (normative) Method of test for resistance to water transfer</b> .....	<b>38</b>
<b>Bibliography</b> .....	<b>43</b>
