Australian Standard[®]

Piling—Design and installation

This Australian Standard was prepared by Committee CE/18, Piling. It was approved on behalf of the Council of Standards Australia on 31 May 1995 and published on 5 August 1995.

The following interests are represented on Committee CE/18:

Australian Building Codes Board
Australian Construction Services, Department of Administrative Services
Australian Geomechanics Society
AUSTROADS
Institution of Engineers, Australia
Maritime Services Board of New South Wales
Monash University
Railways of Australia
The Association of Consulting Engineers, Australia
Timber Preservers Association of Australia
University of Sydney

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 92097.

PREFACE

This Standard has been produced by the Standards Australia Committee CE/18 on Piling, and supersedes AS 2159—1978, *Rules for the design and installation of piling (known as the SAA Piling Code)*.

This Standard has been prepared because of a growing perception within the user community that the earlier document was becoming outdated and also that, in common with other modern structural codes, the Piling Code should appear in limit state format.

It was also considered that the material should be in two parts, viz. a Code of Practice which presents mandatory rules for the design, installation and testing of piled footings and guidelines which provide additional information and recommendations in relation to the Code of Practice.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

CONTENTS

	<i>Page</i>
FOREWORD	5
 SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	6
1.2 APPLICATION	6
1.3 REFERENCED DOCUMENTS	6
1.4 DEFINITIONS	7
1.5 NOTATION	8
1.6 CLASSIFICATION OF PILES	10
1.7 USE OF ALTERNATIVE MATERIALS OR METHODS	11
 SECTION 2 SITE INVESTIGATIONS	
2.1 SITE INVESTIGATION	12
2.2 INFORMATION REQUIRED	12
 SECTION 3 DESIGN REQUIREMENTS AND PROCEDURES	
3.1 AIM	13
3.2 DESIGN REQUIREMENTS	13
3.3 LOADS AND LOAD COMBINATIONS FOR STRENGTH AND SERVICEABILITY DESIGN	14
 SECTION 4 GEOTECHNICAL DESIGN	
4.1 SCOPE	16
4.2 GENERAL PRINCIPLES OF GEOTECHNICAL STRENGTH DESIGN ...	16
4.3 DETAILED DESIGN REQUIREMENTS FOR STRENGTH	18
4.4 GENERAL PRINCIPLES OF GEOTECHNICAL DESIGN FOR SERVICEABILITY	21
4.5 DETAILED DESIGN REQUIREMENTS FOR SERVICEABILITY	21
 SECTION 5 STRUCTURAL DESIGN	
5.1 SCOPE	23
5.2 GENERAL PRINCIPLES OF STRUCTURAL STRENGTH DESIGN	23
5.3 CONCRETE AND GROUT PILES	24
5.4 STEEL PILES	25
5.5 COMPOSITE STEEL CONCRETE	25
5.6 TIMBER PILES	25
 SECTION 6 DESIGN FOR DURABILITY	
6.1 SCOPE	28
6.2 DESIGN FOR DURABILITY OF CONCRETE PILES	28
6.3 DESIGN FOR DURABILITY OF STEEL PILES	30
6.4 DESIGN FOR DURABILITY OF TIMBER PILES	32
