Electric motor-operated tools - Dust measurement procedure - Part 2-5: Particular requirements for circular saws

I.S. EN 50632-2-5:2016&A1:2021

Incorporating amendments/corrigenda/National Annexes issued since publication:

EN 50632-2-5:2016/A1:2021

The National Standards Authority of Ireland (NSAI) produces the following categories of formal documents:

I.S. xxx: Irish Standard — national specification based on the consensus of an expert panel and subject to public consultation.

S.R. xxx: Standard Recommendation — recommendation based on the consensus of an expert panel and subject to public consultation.

SWiFT xxx: A rapidly developed recommendatory document based on the consensus of the participants of an NSAI workshop.

This document replaces/revises/consolidates the NSAI adoption of the document(s) indicated on the CEN/CENELEC cover/Foreword and the following National document(s):

NOTE: The date of any NSAI previous adoption may not match the date of its original CEN/CENELEC document.

This document is based on:

EN 50632-2-5:2016

Published:

2016-07-22

This document was published under the authority of the NSAI and comes into effect on:

2021-10-11

ICS number:

13.040.40

25.140.20

National Foreword

I.S. EN 50632-2-5:2016&A1:2021 is the adopted Irish version of the European Document EN 50632-2-5:2016, Electric motor-operated tools - Dust measurement procedure - Part 2-5: Particular requirements for circular saws

This document does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with this document does not of itself confer immunity from legal obligations.

In line with international standards practice the decimal point is shown as a comma (,) throughout this document.

Motorbetriebene Elektrowerkzeuge - Staubmessverfahren -
Teil 2-5: Besondere Anforderungen für Kreissägen

This amendment A1 modifies the European Standard EN 50632-2-5:2016; it was approved by CENELEC on 2021-08-09. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this amendment the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This amendment exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

European foreword

This document (EN 50632-2-5:2016/A1:2021) has been prepared by CLC/TC 116 “Safety and environmental aspects of motor-operated electric tools”.

The following dates are fixed:

- latest date by which this document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2022-08-09
- latest date by which the national standards conflicting with this document have to be withdrawn (dow) 2024-08-09

This amendment was developed to include improvements and clarifications suggested by practical tests.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC shall not be held responsible for identifying any or all such patent rights.

Any feedback and questions on this document should be directed to the users' national committee. A complete listing of these bodies can be found on the CENELEC website.

EN 50632-2-5:2016/A1:2021 (E)

1 Modification to the European foreword

Replace the 5th paragraph with the following:

“This Part 2 is to be used in conjunction with EN 50632-1:2015 and its amendments.”

2 Modification to 4.3, “Operating conditions”

Replace the existing Table 101 with the following:

“

Table 101 — Operating conditions for circular saws intended to cut wood

Material and set-up	Chipboard: P2 in accordance with EN 312:2010, density (610 ± 60) kg/m ³ , thickness (19 ± 1) mm, width (400 ± 2) mm, any length <i>a</i> . Chipboard is mounted horizontally on a bench with a working height matching the requirement for the vertical distance between the upper surface of the workpiece and the intake openings of the dust samplers as specified in 4.2.
Orientation and operation	Sawing of approximately 10 mm wide strips, over the width of 400 mm. The rip fence, if available, shall be used to perform the cuts. If a rip fence is not available, the cuts shall be performed using a guide rail. All available handles shall be used as specified in the instruction manual. During the test, the operator shall be positioned as illustrated in Figure 101. The test set-up illustrated in Figure 101 is appropriate for tools for right-handed use. For tools for left-handed use, the test set-up may be mirror-inverted.
Tool bit/settings	New saw blade as specified by the manufacturer for sawing chipboard at the beginning of each of the three tests. Speed setting devices, if any, shall be adjusted to the setting specified for sawing chipboard. Cutting depth: (30 ± 1) mm, or as close as possible to this value.
Feed force	The feed force applied to the tool shall be sufficient to ensure stable operation with good performance.
Test	During the working time of one test cycle, 30 cuts as specified above are performed equally distributed over the working time. NOTE Cutting 30 cuts in 10 min will require a cutting speed of 1,5 m/min, including sufficient time between the individual cuts. If the above cannot be achieved within 10 min, the time is extended to allow the required number of strips to be cut.

“

3 Addition of Figure 101

After Clause 6, **add** the following new figure:

“

Key

- 1 workpiece
- 2 tool
- 3 operator
- a length of the workpiece

Figure 101 — Orientation of workpiece, tool and operator during the tests

”

European foreword

This document (EN 50632-2-5:2016) has been prepared by CLC/TC 116 "Safety of motor-operated electric tools".

The following dates are fixed:

- latest date by which this document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2017-05-03
- latest date by which the national standards conflicting with this document have to be withdrawn (dow) 2018-05-03

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC [and/or CEN] shall not be held responsible for identifying any or all such patent rights.

This European Standard is divided into three parts:

Part 1: General requirements for the dust measurement which are common to electric motor-operated tools (for the purpose of this standard referred to simply as tools);

Part 2 or 3: Requirements for the dust measurement for particular types of tools, which either supplement or modify the requirements given in Part 1 to account for the particular characteristics of these specific tools.

This Part 2 is to be used in conjunction with EN 50632-1:2015.

This Part 2 supplements or modifies the corresponding clauses in EN 50632-1:2015.

This Part 2 was developed to set out requirements for the measurement of the concentration for inhalable and respirable dust emitted by circular saws.

Where a particular subclause of Part 1 is not mentioned in this Part 2, that subclause applies as far as reasonable. When this standard states "addition", "modification" or "replacement", the relevant text in Part 1 is to be adapted accordingly.

Subclauses, tables and figures which are additional to those in Part 1 are numbered starting from 101.

This European Standard has been drafted in accordance with the CEN/CENELEC Internal Regulations, Part 3.

The following print types are used:

- requirements proper: in roman type;
- *test specifications: in italic type;*
- explanatory matter: in smaller roman type.

The terms defined in Clause 3 are printed in **bold typeface**.
