

AS ISO 1000—1998  
ISO 1000:1992

Australian Standard<sup>TM</sup>

---

**The international system of units  
(SI) and its application**

---

[ISO title: SI units and recommendations for the use of their multiples  
and of certain other units]

This Australian Standard was prepared by Committee ME/71, Quantities, Units and Conversions. It was approved on behalf of the Council of Standards Australia on 14 August 1998 and published on 5 November 1998.

---

The following interests are represented on Committee ME/71:

CSIRO—Division of Telecommunications and Industrial Physics  
Department of Industry Science and Tourism (Commonwealth)  
Monash University  
National Association of Testing Authorities Australia  
University of Sydney

---

**Review of Australian Standards.** *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

*Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.*

*Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.*

---

*This Standard was issued in draft form for comment as DR 98008.*

## PREFACE

This Standard was prepared by the Standards Australia Committee ME/71, Quantities, Units and Conversions, to supersede AS 1000—1979.

This Standard is identical with, and has been reproduced from, ISO 1000:1992, *SI units and recommendations for the use of their multiples and of certain other units*, with the addition of Appendix AA to reflect the Australian situation. Appendix AA is given for information only and does not form part of the Standard.

The objective of this Standard is to provide users with the standardization of units and symbols for quantities and units (and mathematical symbols) used within the different fields of science and technology, giving, where necessary, definitions of these quantities and units.

Users of this Standard are advised by Standards Australia, under arrangements made with ISO and IEC, as well as certain other Standards organizations, that the number of this Standard is not reproduced on each page; its identity is shown only on the cover, inside front cover and title pages.

For the purpose of this Standard, the ISO text should be modified as follows:

- (a) *Terminology* The words ‘this Australian Standard’ should replace the words ‘this International Standard’ wherever they appear.
- (b) *Decimal marker* Substitute a full point for a comma where it appears as a decimal marker.
- (c) *References* The reference to the International Standards should be replaced by reference to the following Australian Standard:

*Reference to International Standard  
or other Publication*

*Australian Standard*

ISO/IEC

AS

27.1 Letter symbols to be used in electrical  
technology

1046 Letter symbols for use in  
electrotechnology

27.1 Part 1: General

1046.1 Part 1: General

### © Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

## CONTENTS

	<i>Page</i>
1 SCOPE .....	1
2 NORMATIVE REFERENCE .....	1
3 SI UNITS .....	1
3.1 BASE UNITS .....	1
3.2 DERIVED UNITS INCLUDING SUPPLEMENTARY UNITS .....	2
4 MULTIPLES OF SI UNITS .....	2
5 USE OF SI UNITS AND THEIR MULTIPLES .....	4
6 RULES FOR WRITING UNIT SYMBOLS .....	4
7 NON-SI UNITS WHICH MAY BE USED WITH SI UNITS AND THEIR MULTIPLES .....	5
 ANNEX	
A EXAMPLE OF DECIMAL MULTIPLES AND SUB-MULTIPLES OF SI UNITS AND OF SOME OTHER UNITS WHICH MAY BE USED .....	7
B DEFINITIONS OF THE BASE UNITS OF THE INTERNATIONAL SYSTEM OF UNITS .....	22
AA MEANING OF THE TERMS MILLION, BILLION, TRILLION AND QUADRILLION .	23
