

Australian Standard™

**Pneumatic fluid power—General
requirements for systems
(ISO 4414:1998, MOD)**

This Australian Standard was prepared by Committee ME-035, Fluid Power Systems and Components. It was approved on behalf of the Council of Standards Australia on 31 July 2002 and published on 5 August 2002.

The following are represented on Committee ME-035:

Australian Chamber of Commerce and Industry
Australian Industry Group
Australian Institute of Petroleum
Bureau of Steel Manufacturers of Australia
Department of Mineral Resources N.S.W
Institution of Engineers Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

Australian Standard™

**Pneumatic fluid power—General
requirements for systems
(ISO 4414:1998, MOD)**

Originated as AS B203—1964.
Revised and redesignated as AS 2788—1985.
Second edition 2002.

PREFACE

This Standard was prepared by the Standards Australia Committee ME-035, Fluid Power Systems and Components to supersede AS 2788—1985, *Fluid power—Pneumatic systems and components*.

The objective of this Standard is to provide designers and operators of fluid power systems with the general requirements relating to the safety, reliability and maintainability for pneumatic fluid power systems.

This Standard is adopted with Australian modifications and has been reproduced from ISO 4414:1998, *Pneumatic fluid power—General rules relating to systems*.

The Australian modifications are listed in Appendix ZZ and are indicated by margin bars in the text of the Standard.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the annex or appendix to which they apply. A normative annex or appendix is an integral part of a Standard, whereas an ‘informative’ annex or appendix is only for information and guidance.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number appears on the cover and title page while the International Standard number appears only on the cover.
- (b) In the source text, ‘this International Standard’ should read this ‘Australian Standard’.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by Australian Standards as follows:

<i>Reference to International Standard</i>	<i>Australian Standard</i>
