IEC 60947-1, Ed. 5.2 (2014)

AS/NZS IEC 60947.1:2015

Australian/New Zealand Standard™

**Low-voltage switchgear and controlgear**

**Part 1: General rules**

## **AS/NZS IEC 60947.1:2015**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-006, Industrial Switchgear and Controlgear. It was approved on behalf of the Council of Standards Australia on 19 May 2015 and on behalf of the Council of Standards New Zealand on 29 May 2015. This Standard was published on 29 June 2015.

---

The following are represented on Committee EL-006:

Association of Accredited Certification Bodies  
Ausgrid  
Australian Chamber of Commerce and Industry  
Australian Industry Group  
Bureau of Steel Manufacturers of Australia  
Business New Zealand  
Electrical Contractors Association of New Zealand  
Engineers Australia  
National Electrical and Communications Association  
National Electrical Switchboard Manufacturers Association  
Rail Industry Safety and Standards Board (RISSB)

---

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.saiglobal.com.au](http://www.saiglobal.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

---

*This Standard was issued in draft form for comment as DR AS/NZS IEC 60947.1:2015.*

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-006, Industrial Switchgear and Controlgear, to supersede AS 60947.1—2004.

The objective of this Standard is to state the general rules and common safety requirements for low voltage switchgear and controlgear.

This Standard is identical with, and has been reproduced from, IEC 60947-1, Ed. 5.2 (2014), *Low-voltage switchgear and controlgear*, Part 1: *General rules*. A vertical line in the margin shows where IEC 60947-1, Ed. 5.0 (2007), is modified by its Amendments 1 (2010) and 2 (2014). Additions and deletions are displayed in red, with deletions being struck through.

As this Standard is reproduced from an International Standard, a full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>		<i>Australian/New Zealand Standard</i>
