

Australian/New Zealand Standard™

Safety of machinery

Part 1901: Displays, controls, actuators and signals—Ergonomic requirements for the design of displays and control actuators—General principles for human interactions with displays and control actuators

AS/NZS 4024.1901:2014, Safety of machinery – Part 1901: Displays, controls, actuators and signals—Ergonomic requirements for the design of displays and control actuators—General principles for human interactions with displays and control actuators, is an identical adoption of EN 894-1:1997+A1:2008, Safety of machinery—Ergonomics requirements for the design of displays and control actuators - Part 1: General principles for human interactions with displays and control actuators, and is reproduced with the permission of CEN, Avenue Marnix 17, B-1000 Brussels, Belgium. All exploitation rights of the European Standards in any form and by any means are reserved world-wide to CEN and its National Members, and no reproduction may be undertaken without express permission in writing by CEN through Standards Australia Limited and/or Standards New Zealand.

AS/NZS 4024.1901:2014

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee SF-041, General Principles for the Guarding of Machinery. It was approved on behalf of the Council of Standards Australia on 5 June 2014 and on behalf of the Council of Standards New Zealand on 24 April 2014. This Standard was published on 30 June 2014.

The following are represented on Committee SF-041:

Australian Chamber of Commerce and Industry
Australian Industry Group
Australian Manufacturing Workers Union
Department of Mines and Petroleum, WA
Department of the Premier and Cabinet, SA
Engineers Australia
Federal Chamber of Automotive Industries
Human Factors and Ergonomics Society of Australia
Institute of Instrumentation, Control and Automation
National Safety Council of Australia
New Zealand Electrical Institute
NSW Department of Trade and Investment, Regional Infrastructure and Services
Safety Institute of Australia
University of Melbourne
Winery Engineering Association
WorkCover New South Wales
WorkSafe NZ
WorkSafe Victoria

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia Web Site at www.standards.org.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR AS/NZS 4024.1901.

AS/NZS 4024.1901:2014

Australian/New Zealand Standard™

Safety of machinery

Part 1901: Displays, controls, actuators and signals—Ergonomic requirements for the design of displays and control actuators—General principles for human interactions with displays and control actuators

Originated in Australia as part of AS 4024.1(Int)—1992.
Previous edition AS 4024.1901—2006.
Jointly revised and designated as AS/NZS 4024.1901:2014.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee SF-041, General Principles for the Guarding of Machinery, to supersede AS 4024.1901—2006.

It is emphasized that this Standard is part of the AS(/NZS) 4024.1 series and it is imperative that it is used in conjunction with other applicable parts of the series. A complete listing of all current parts of the AS(/NZS) 4024.1 series can be found at the Standards Australia website <www.standards.org.au> and in AS/NZS 4024.1100, *Safety of machinery*, Part 1100: *Application Guide*.

The objective of this Standard is to specify the general principle for human interaction with displays and control actuators, to minimize operator errors, and to ensure an efficient interaction between the operator and the equipment.

This Standard is identical with, and has been reproduced from EN 894-1:1997, *Safety of machinery—Ergonomics requirements for the design of displays and control actuators*, Part 1: *General principles for human interactions with displays and control actuators*, and its Amendment 1 (2008). The start and finish of text introduced or altered by amendment is indicated in the text by tags A1 A1.

As this Standard is reproduced from an International Standard, the following applies:

- (a) In the source text ‘this European Standard’ should read ‘this Australian/New Zealand Standard’.
- (b) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>	<i>Australian/New Zealand Standard</i>
EN	AS/NZS
292 Safety of machinery—Basic concepts, general principles for design	4024 Safety of machinery
292-1 Part 1: Basic terminology, methodology	4024.1201 Part 1201: General principles for design—Risk assessment and risk reduction
292-2 Part 2: Technical principles and specifications	4024.1201 Part 1201: General principles for design—Risk assessment and risk reduction
418 Safety of machinery—Emergency stop equipment, functional aspects—Principles for design	4024.1604 Part 1604: Design of controls, interlocks and guarding—Emergency stop—Principles for design
prEN	
894 Safety of machinery—Ergonomics requirements for the design of displays and control actuators	
894-2 Part 2: Displays	4024.1902 Displays, controls, actuators and signals—Ergonomic requirements for the design of displays and control actuators—Displays
894-3 Part 3: Control actuators	4024.1903 Displays, controls, actuators and signals—Ergonomic requirements for the design of displays and control actuators—Control actuators

The term ‘informative’ has been used in this Standard to define the application of the annex to which it applies. An ‘informative’ annex is only for information and guidance.

CONTENTS

Introduction	4
1 Scope	4
2 Normative references	4
3 Definitions	4
4 Design principles for operator-task relationships	5
4.1 Suitability for the task	5
4.1.1 Principle of function allocation	6
4.1.2 Principle of complexity	6
4.1.3 Principle of grouping	6
4.1.4 Principle of identification	7
4.1.5 Principle of operational relationship	7
4.2 Self-descriptiveness	7
4.2.1 Principle of information availability	7
4.3 Controllability	7
4.3.1 Principle of redundancy	8
4.3.2 Principle of accessibility	8
4.3.3 Principle of movement space	8
4.4 Conformity with user expectations	8
4.4.1 Principle of compatibility with learning	8
4.4.2 Principle of compatibility with practice	9
4.4.3 Principle of consistency	9
4.5 Error tolerance	9
4.5.1 Principle of error correction	9
4.5.2 Principle of error handling time	9
4.6 Suitability for individualisation and learning	10
4.6.1 Principle of flexibility	10
Annex A (informative) Human information processing	11
Annex ZA (informative)  Relationship between this European Standard and the Essential Requirements of EU Directive 98/37/EC, amended by 98/79/EC 	18
Annex ZB (informative)  Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC 	19
