

AS/NZS 2290.1:2014

AS/NZS 2290.1:2014

Australian/New Zealand Standard™

**Electrical equipment for coal mines—
Introduction, inspection and
maintenance**

Part 1: For hazardous areas

AS/NZS 2290.1:2014

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-023, Electrical Equipment for Mines and Quarries. It was approved on behalf of the Council of Standards Australia on 3 December 2013 and on behalf of the Council of Standards New Zealand on 12 December 2013.
This Standard was published on 11 February 2014.

The following are represented on Committee EL-023:

Australian Cablemakers Association
Australian Chamber of Commerce and Industry
Australian Coal Association
Australian Industry Group
Aviation and Marine Engineers Association
Consult Australia
Department of Mines and Petroleum, WA
Department of Natural Resources and Mines, Qld
Mining Electrical and Mining Mechanical Engineering Society
Ministry of Business, Innovation and Employment, New Zealand
National Association of Testing Authorities Australia
NSW Department of Trade and Investment, Regional Infrastructure and Services
University of Newcastle
WorkCover New South Wales

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR AS/NZS 2290.1.

AS/NZS 2290.1:2014

Australian/New Zealand Standard™

Electrical equipment for coal mines— Introduction, inspection and maintenance

Part 1: For hazardous areas

Originated in Australia as AS 2290.1—1979.
Previous edition AS/NZS 2290.1:2005.
Fourth edition 2014.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-023, *Electrical Equipment for Mines and Quarries*, to supersede AS/NZS 2290.1:2005, *Electrical equipment for coal mines—Introduction and maintenance, Part 1: For hazardous areas*.

The objective of this Standard is to facilitate the safe, efficient and productive use of electrical explosion-protected equipment and cables in underground coal mine hazardous areas, by specifying requirements and recommendations for the inspection and maintenance of such equipment.

This Standard is part of a series of standards on the maintenance and overhaul of electrical equipment used in association with underground mining machines. The series is as follows:

- (a) AS/NZS 2290.1, *Electrical equipment for coal mines—Introduction and maintenance, Part 1: For hazardous areas* (this Standard).
- (b) AS 2290.3, *Electrical equipment for coal mines—Maintenance and overhaul, Part 3: Maintenance of gas detecting and monitoring equipment*.

In addition, this Standard aligns with AS/NZS 3800:2012, *Electrical equipment for explosive atmospheres—Repair and overhaul*.

The principal differences between this edition and the 2005 edition are as follows:

- (i) Life-cycle management of explosion-protected equipment has been embraced.
- (ii) The range of inspections has been expanded to include initial and periodic inspections.
- (iii) A risk-based process is required for the identification of ‘readily accessible components’ and the determination of ‘inspection frequency’; however, recommended inspection schedules for individual explosion-protection techniques have been retained.
- (iv) An electrical engineering manager has been specified as the process owner and responsible decision maker.
- (v) General inspection requirements that are applicable to all explosion-protection techniques have been included.
- (vi) The range of explosion-protection techniques has been expanded to address currently installed equipment.
- (vii) This Standard has been aligned with the AS/NZS 60079 series, where compatible with Group I requirements.
- (viii) An alternate risk assessment method encompassing equipment protection levels (EPLs) for Ex equipment is discussed in an informative appendix.

NOTE: See Appendix M.

The term ‘informative’ has been used in this Standard to define the application of the appendix to which it applies. An ‘informative’ appendix is only for information and guidance.

Statements expressed in mandatory terms in footnotes to tables are deemed to be requirements of this Standard.

CONTENTS

	<i>Page</i>
FOREWORD.....	5
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE.....	6
1.2 NORMATIVE REFERENCES	6
1.3 DEFINITIONS.....	7
SECTION 2 GENERAL REQUIREMENTS	
2.1 LIFE CYCLE MANAGEMENT.....	10
2.2 DOCUMENTATION.....	11
2.3 COMPETENCY	12
2.4 INSPECTIONS	13
2.5 INITIAL INSPECTION REQUIREMENTS	15
2.6 PERIODIC INSPECTION REQUIREMENTS	16
2.7 PRE-OVERHAUL AUDIT REQUIREMENTS	17
2.8 MAINTENANCE REQUIREMENTS	19
2.9 ENVIRONMENTAL CONDITIONS	20
2.10 ISOLATION OF EQUIPMENT.....	20
2.11 EARTHING AND EQUIPOTENTIAL BONDING	21
2.12 SPECIFIC CONDITIONS OF USE	22
2.13 MOBILE, PORTABLE AND TRANSPORTABLE EQUIPMENT AND ITS CONNECTIONS	22
2.14 GENERAL INSPECTION REQUIREMENTS	22
SECTION 3 SPECIFIC INSPECTION REQUIREMENTS	
3.1 GENERAL.....	25
3.2 TYPE OF PROTECTION ‘d’—FLAMEPROOF ENCLOSURE	25
3.3 TYPE OF PROTECTION ‘e’—INCREASED SAFETY	30
3.4 TYPE OF PROTECTION ‘i’—INTRINSIC SAFETY.....	31
3.5 TYPE OF PROTECTION ‘p’—PRESSURIZED ENCLOSURE	36
3.6 TYPE OF PROTECTION ‘m’—ENCAPSULATION	37
3.7 TYPE OF PROTECTION ‘o’—OIL-IMMERSION.....	37
3.8 TYPE OF PROTECTION ‘q’—POWDER-FILLING.....	37
3.9 TYPE OF PROTECTION ‘s’—SPECIAL PROTECTION	37
3.10 EXPLOSION PROTECTED CAPLIGHTS	38
