Irish Standard
I.S. EN 12012-4:2019+A1:2021

Plastics and rubber machines - Size reduction machines - Part 4: Safety requirements for agglomerators

I.S. EN 12012-4:2019+A1:2021

Incorporating amendments/corrigenda/National Annexes issued since publication:

The National Standards Authority of Ireland (NSAI) produces the following categories of formal documents:

I.S. xxx: Irish Standard — national specification based on the consensus of an expert panel and subject to public consultation.

S.R. xxx: Standard Recommendation — recommendation based on the consensus of an expert panel and subject to public consultation.

SWiFT xxx: A rapidly developed recommendatory document based on the consensus of the participants of an NSAI workshop.

This document replaces/revises/consolidates the NSAI adoption of the document(s) indicated on the CEN/CENELEC cover/Foreword and the following National document(s):

NOTE: The date of any NSAI previous adoption may not match the date of its original CEN/CENELEC document.

This document is based on:

EN 12012-4:2019+A1:2021

National Foreword

I.S. EN 12012-4:2019+A1:2021 is the adopted Irish version of the European Document EN 12012-4:2019+A1:2021, Plastics and rubber machines - Size reduction machines - Part 4: Safety requirements for agglomerators

This document does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

For relationships with other publications refer to the NSAI web store.

Compliance with this document does not of itself confer immunity from legal obligations.

In line with international standards practice the decimal point is shown as a comma (,) throughout this document.

NORME EUROPÉENNE

EUROPÄISCHE NORM

October 2021

ICS 83.200

Supersedes EN 12012-4:2019

English Version

Plastics and rubber machines - Size reduction machines - Part 4: Safety requirements for agglomerators

Machines pour les matières plastiques et le caoutchouc
- Machines à fragmenter - Partie 4 : Prescriptions de
sécurité relatives aux agglomérateurs

Kunststoff- und Gummimaschinen -
Zerkleinerungsmaschinen - Teil 4:
Sicherheitsanforderungen für Agglomeratoren

This European Standard was approved by CEN on 29 April 2019 and includes Amendment 1 approved by CEN on 3 August 2021.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

EN 12012-4:2019+A1:2021 (E)

European foreword

This document (EN 12012-4:2019+A1:2021) has been prepared by Technical Committee CEN/TC 145 “Plastics and rubber machines”, the secretariat of which is held by UNI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by April 2022, and conflicting national standards shall be withdrawn at the latest by April 2022.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes A1 EN 12012-4:2019 A1.

The start and finish of text introduced or altered by amendment is indicated in the text by tags A1 A1.

This document has been prepared under a Standardization Request given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s) / Regulation(s).

For relationship with EU Directive(s) / Regulation(s), see informative Annex ZA, which is an integral part of this document.

The main changes compared to the EN 12012-4:2006+A1:2008 are:

- the revision of type-A and type-B standards have been considered;
- the list of significant hazards has been moved to an informative annex;
- the performance levels/safety integrity levels of safety related parts of control systems have been specified in accordance with EN ISO 13849-1:2015 / EN 62061:2005, EN 62061:2005/A1:2013, EN 62061:2005/A2:2015;
- the hazards related to the ejection of parts or materials from the agglomerator chamber have been removed because reliable and well-designed chambers represent now the state of the art (no projections and no broken chamber have been reported for a long time);
- feed openings of big dimensions are considered;
- requirements for moving parts of discharge systems are added;
- A1 — the agglomerators with actuators moved by pneumatic and/or hydraulic energy have been excluded from the Scope; A1
- the annex for noise measurement has been revised.

A1 In comparison with the original version EN 12012-4:2019, the following technical and editorial modifications have been made by amendment EN 12012-4:2019/A1:2021:

- European Foreword: dash added;
- Scope: editorial modification and dash added;

- Normative references: a reference date updated;
- 4.2.1: updated normative references;
- 4.2.3: updated normative reference;
- 4.6.1.3: modified text;
- 4.6.1.4: modified text;
- 4.7.2: modified text;
- 4.7.3: updated normative reference;
- 6.2.1: modified text;
- 6.3.2: modified text;
- Table Annex ZA: modified text. A1

Any feedback and questions on this document should be directed to the users' national standards body. A complete listing of these bodies can be found on the CEN website.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

EN 12012-4:2019+A1:2021 (E)

Introduction

This document is a type-C standard as stated in EN ISO 12100:2010.

This document is of relevance, in particular, for the following stakeholder groups representing the market players with regard to machinery safety:

- machine manufacturers (small, medium and large enterprises);
- health and safety bodies (regulators, accident prevention organizations, market surveillance, etc.).

Others can be affected by the level of machinery safety achieved with the means of the document by the above-mentioned stakeholder groups:

- machine users/employers (small, medium and large enterprises);
- machine users/employees (e.g. trade unions, organizations for people with special needs);
- service providers, e.g. for maintenance (small, medium and large enterprises);
- consumers (in case of machinery intended for use by consumers).

The above-mentioned stakeholder groups have been given the possibility to participate at the drafting process of this document.

The machinery concerned and the extent to which hazards, hazardous situations or hazardous events are covered are indicated in the Scope of this document.

When requirements of this type-C standard are different from those which are stated in type-A or type-B standards, the requirements of this type-C standard take precedence over the requirements of the other standards for machines that have been designed and built according to the requirements of this type-C standard.

1 Scope

A1 This document deals with all significant hazards, hazardous situations and events relevant to agglomerators for the modification of plastic scraps in its form, size and flow characteristics, when they are used as intended and under conditions of misuse which are reasonably foreseeable by the manufacturer (see Annex A). The hazards have been identified taking into account all phases of the machine life cycle according to EN ISO 12100:2010, 5.4.

Machines considered in this document begin at the outer edge of the feed opening and end at the outer edge of the discharge opening.

This document does not deal with:

- hazards due to emissions by processing materials that could be hazardous to health;
- hazards caused by ignition of flammable residues in material to be processed;
- requirements for exhaust ventilation systems;
- agglomerators moved by pneumatic and/or hydraulic energy.

This document is not applicable to agglomerators manufactured before the date of its publication. **A1**
