

AS/NZS 60065:2003  
(Incorporating Amendment No. 1)

AS/NZS 60065:2003

Australian/New Zealand Standard™

**Audio, video and similar electronic  
apparatus—Safety requirements  
(IEC 60065:2001, MOD)**

### **AS/NZS 60065:2003**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee TE-001, Safety of Electronic Equipment. It was approved on behalf of the Council of Standards Australia on 14 March 2003 and on behalf of the Council of Standards New Zealand on 23 April 2003.  
This Standard was published on 8 May 2003.

---

The following are represented on Committee TE-001:

Australian Chamber of Commerce and Industry  
Australian Communications Authority  
Australian Electrical and Electronic Manufacturers Association  
Australian Information Industry Association  
Consumer Electronics Association of New Zealand  
Consumer Electronics Suppliers Association  
Department of Defence, Australia  
Electrical Compliance Testing Association  
Electrical Regulatory Authorities  
Electricity Supply Association of Australia  
Federation of Australian Commercial Television Stations  
International Accreditation, New Zealand  
Institution of Radio and Electronics Engineers, Australia  
Ministry of Economic Development, New Zealand  
Singtel Optus  
Telstra

---

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.standards.com.au](http://www.standards.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee, Safety of Electronic Equipment to supersede AS/NZS 60065:2000, *Audio, video and similar electronic apparatus—Safety requirements* on 1 July 2006. During this period it is anticipated that regulatory authorities will approve apparatus to either Standard.

*This Standard incorporates Amendment No. 1 (January 2008). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.*

The objective of this Standard is to provide manufacturers, users and regulators with safety requirements for electrically powered equipment intended for the reception, generation, recording or reproduction of audio, video and associated signals.

This Standard is an adoption with national modifications and has been reproduced from IEC 60065:2001, *Audio, video and similar electronic apparatus—Safety requirements* including Corrigendum 1 (August 2002), and has been varied as indicated to take account of Australian/New Zealand conditions.

Variations to IEC 60065:2001 are indicated at the appropriate places throughout this standard. Strikethrough (~~example~~) identifies IEC text, tables and figures which, for the purposes of this Australian/New Zealand Standard, are deleted. Where text, tables or figures are added, each is set in its proper place and identified by shading (example). Added figures are not themselves shaded, but are identified by a shaded border.

In this Standard, the following print types are used:

- requirements proper: in arial type;
- *test specifications: in italic type;*
- explanatory matter: in smaller arial type.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text ‘this standard’ should read ‘this Australian/New Zealand Standard’.
- (c) A full point should be substituted for a comma when referring to a decimal marker.

The terms ‘normative’ and ‘informative’ are used to define the application of the annex to which they apply. A normative annex is an integral part of a standard, whereas an informative annex is only for information and guidance.

## CONTENTS

	<i>Page</i>
Introduction .....	viii
1 General.....	1
1.1 Scope .....	1
1.2 Normative references.....	3
2 Definitions.....	7
2.1 Definitions in alphabetical order.....	7
2.2 Types of apparatus .....	9
2.3 Ratings and electrical values .....	10
2.4 Supply and external connections.....	11
2.5 Signals, sources, loads .....	13
2.6 Protection against electric shock, insulations .....	13
2.7 Components .....	14
2.8 Miscellaneous.....	16
3 General requirements .....	17
4 General test conditions .....	17
4.1 Conduct of tests.....	17
4.2 Normal operating conditions.....	18
4.3 Fault conditions .....	21
5 Marking and instructions .....	23
5.1 Identification and supply ratings.....	24
5.2 TERMINALS.....	25
6 Hazardous radiations .....	27
6.1 Ionizing radiation .....	27
6.2 Laser radiation.....	27
7 Heating under normal operating conditions .....	29
7.1 General.....	29
7.2 Heat resistance of insulating material .....	32
8 Constructional requirements with regard to the protection against electric shock.....	33
9 Electric shock hazard under normal operating conditions .....	41
9.1 Testing on the outside.....	41
9.2 Removal of protective covers .....	44
10 Insulation requirements.....	44
10.1 Surge test.....	44
10.2 Humidity treatment.....	45
10.3 Insulation resistance and dielectric strength.....	46
11 Fault conditions.....	48
11.1 Electric shock hazard.....	48
11.2 Heating .....	48
12 Mechanical strength.....	51
12.1 Complete apparatus.....	51
12.2 Fixing of actuating elements .....	53
12.3 REMOTE CONTROL devices held in hand.....	54
12.4 Drawers .....	54
