

AS/NZS 3350.2.17:2000
(Incorporating Amendment Nos 1, 2 and 3)

AS/NZS 3350.2.17:2000

Australian/New Zealand Standard™

**Safety of household and similar
electrical appliances**

**Part 2.17: Particular requirements—
Blankets, pads and similar flexible
heating appliances
(IEC 60335-2-17:1998, MOD)**

AS/NZS 3350.2.17:2000

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-002, Safety of Household and Similar Electrical Appliances and Small Power Transformers. It was approved on behalf of the Council of Standards Australia on 15 February 2000 and on behalf of the Council of Standards New Zealand on 29 May 2000.

This Standard was published on 16 June 2000.

The following are represented on Committee EL-002:

Association of Certification Bodies
Australian Chamber of Commerce and Industry
Australian Electrical and Electronic Manufacturers Association
Canterbury Manufacturers Association New Zealand
Consumer Electronic Suppliers Association, Australia
Electrical regulatory authorities, Australia
Electrical test laboratories
Electrical consultants
Electricity Supply Association of Australia
Institution of Engineers Australia
Metal Trades Industries Association of Australia
Ministry of Consumer Affairs, New Zealand

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

CONTENTS

FOREWORD.....	4
INTRODUCTION.....	6
1 Scope	7
2 Definitions.....	7
3 General requirement.....	9
4 General conditions for the tests	9
5 Void	11
6 Classification.....	11
7 Marking and instructions	11
8 Protection against access to live parts	13
9 Starting of motor-operated appliances.....	13
10 Power input and current.....	13
11 Heating	14
12 Void	16
13 Leakage current and electric strength at operating temperature	16
14 Void	16
15 Moisture resistance	16
16 Leakage current and electric strength	17
17 Overload protection of transformers and associated circuits	18
18 Endurance.....	18
19 Abnormal operation	18
20 Stability and mechanical hazards.....	21
21 Mechanical strength	21
22 Construction.....	28
23 Internal wiring.....	30
24 Components	30
25 Supply connection and external flexible cords	30
26 Terminals for external conductors	31
27 Provision for earthing.....	31
28 Screws and connections	31
29 Creepage distances, clearances and distances through insulation	32
30 Resistance to heat, fire and tracking	32
31 Resistance to rusting	34
32 Radiation, toxicity and similar hazards	34

Annexes	47
Annex A (normative) Normative references.....	47
Annex AA (normative) Specification for the thermal insulation.....	48
Annex BB (normative) Apparatus for the mechanical strength test for blankets	49
Annex ZZ (informative) Variations to IEC 60335-2-17:1998 for application in Australia and New Zealand.....	52
Figure 101 – Symbol for "Read the instructions"	35
Figure 102 – Symbol for "Do not use folded or rucked"	35
Figure 103 – Symbol for "Do not insert pins".....	36
Figure 104 – Grid for the heatstroke test	37
Figure 105 – Arrangement for measuring leakage current of the flexible part.....	37
Figure 106 – Arrangement for the three-thickness fold test	38
Figure 107 – Positioning of the thermal insulation on flexible parts incorporating thermostats	39
Figure 108 – Examples of the position of the thermal insulation on folded pads	40
Figure 109 – Tumbling barrel for testing the mechanical strength of pads.....	41
Figure 110 – Impact apparatus for testing enclosures of moisture-proof appliances	42
Figure 111 – Shape of sample for the tear resistance test.....	43
Figure 112 – Apparatus for flexing heating elements and internal wiring.....	43
Figure 113 – Arrangement for the rigidity test of ruck-resistant blankets	44
Figure 114 – Apparatus for the spark ignition test.....	45
Figure 114a – Details of the mask	46
Figure BB.1 – Apparatus for the mechanical strength test	50
Figure BB.2 – Detail of the drum and cylinders	51
Figure BB.3 – Detail of the clamping bar	51
