

AS/NZS 60335.2.69:2003
(Incorporating Amendment Nos 1, 2 and 3)

AS/NZS 60335.2.69:2003

Australian/New Zealand Standard™

**Household and similar electrical
appliances—Safety**

**Part 2.69: Particular requirements for
wet and dry vacuum cleaners, including
power brush, for industrial and
commercial use
(IEC 60335-2-69 Ed 3.2, MOD)**

AS/NZS 60335.2.69:2003

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-002, Safety of Household and Similar Electrical Appliances and Small Power Transformers. It was approved on behalf of the Council of Standards Australia on 15 April 2003 and on behalf of the Council of Standards New Zealand on 8 May 2003.

This Standard was published on 30 May 2003.

The following are represented on Committee EL-002:

Association of Certification Bodies
Australian Chamber of Commerce and Industry
Australian Electrical and Electronic Manufacturers Association
Canterbury Manufacturers Association New Zealand
Consumer Electronic Suppliers Association, Australia
Electrical regulatory authorities, Australia
Electrical test laboratories
Electrical consultants
Electricity Supply Association of Australia
Institution of Engineers Australia
Metal Trades Industries Association of Australia
Ministry of Consumer Affairs, New Zealand

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 02930.

CONTENTS

FOREWORD.....	4
INTRODUCTION.....	6
1 Scope	7
2 Normative references	8
3 Definitions	9
4 General requirement.....	10
5 General conditions for the tests	10
6 Classification.....	10
7 Marking and instructions	11
8 Protection against access to live parts	13
9 Starting of motor-operated appliances.....	13
10 Power input and current.....	13
11 Heating	13
12 Void	14
13 Leakage current and electric strength at operating temperature	14
14 Transient overvoltages	14
15 Moisture resistance	14
16 Leakage current and electric strength	16
17 Overload protection of transformers and associated circuits	16
18 Endurance.....	16
19 Abnormal operation	16
20 Stability and mechanical hazards	17
21 Mechanical strength	17
22 Construction.....	19
23 Internal wiring.....	20
24 Components	20
25 Supply connection and external flexible cords	21
26 Terminals for external conductors	22
27 Provision for earthing.....	22
28 Screws and connections	22
29 Clearances, creepage distances and solid insulation	22
30 Resistance to heat and fire	22
31 Resistance to rusting	23
32 Radiation, toxicity and similar hazards	23
Annexes	27
Annex A (normative) Routine tests	27
Annex AA (normative) Particular requirements for vacuum cleaners, suction sweeping machines and dust extractors for the collection of dusts hazardous to health	27
Annex BB (informative) List of dusts which are an explosion risk when subject to ignition conditions.....	41

	Annex CC VOID (normative) Particular requirements for vacuum cleaners, suction sweeping machines and dust extractors for the collection of dusts which are an explosion risk	47
	Annex DD (normative) Particular requirements for vacuum cleaners for use in ESD protected areas	55
	Bibliography	58
	Annex ZZ (informative) Variations to IEC 60335-2-69 Ed 3.2 for application in Australia and New Zealand	59
	Figure 101 – Impact test apparatus	24
A1	Figure 102 – Apparatus for testing the abrasion resistance of current-carrying hoses	25
	Figure 103 – Apparatus for testing the resistance to flexing of current-carrying hoses	25
	Figure 104 – Configuration of the hose for the freezing treatment	26
	Figure 105 – Flexing positions for the hose after removal from the freezing cabinet.....	26
A1	Figure AA.1.1 – Warning label for class H appliances	38
+	Figure AA.1.2 – Warning label for class L and M appliances	39
A2	Figure AA.2 – Test method for essential filter material	39
	Figure AA.3 – <i>In situ</i> essential filter element test	40
	Figure AA.4 – Assembled appliance test.....	40
A1	Table AA.1 – Penetration limits	32
	Table AA.2 – Materials having a low susceptibility to ageing	37
