

Australian Standard[®]

**Safety of machinery—Electrical
equipment of machines**

**Part 11: Requirements for HV
equipment for voltages above 1000 V
a.c. or 1500 V d.c and not exceeding 36
kV (IEC 60204-11, Ed. 1.0 (2000) MOD)**

This Australian Standard® was prepared by Committee EL-017, Electrical Equipment of Industrial Machinery. It was approved on behalf of the Council of Standards Australia on 20 November 2006.

This Standard was published on 8 December 2006.

The following are represented on Committee EL-017:

- Department of Consumer and Employment Protection, WorkSafe Division (WA)
 - Department of Industrial Relations (Qld)
 - Department of Primary Industries, Mine Safety (NSW)
 - Electrical Regulatory Authorities Council
 - Federal Chamber of Automotive Industries
 - Victorian WorkCover Authority
-

This Standard was issued in draft form for comment as DR 06457.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **www.standards.org.au**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **mail@standards.org.au**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Committee EL-017, Electrical Equipment of Industrial Machinery.

The objective of this Standard is to provide a framework, and criteria, for assessment of the safety of high voltage electrical equipment of machines.

This Standard is an adoption with national modifications and has been reproduced from IEC 60204-11, Ed. 1.0 (2000), *Safety of machinery—Electrical equipment of machines – Part 11: Requirements for HV equipment for voltages above 1 000 V a.c. or 1 500 V d.c. and not exceeding 36 kV*, and has been varied as indicated to take account of Australian conditions.

The source IEC standard IEC 60204-11, makes numerous references to a European harmonization document HD 637, dealing with high voltage electrical installations. In this Australian standard, the references to HD 637 have been either removed or replaced by reference to the more recent IEC standard IEC 61936-1.

Variations to IEC 60204-11, Ed. 1.0 (2000) are indicated at the appropriate places throughout this standard. Strikethrough (**example**) identifies IEC text, tables and figures which, for the purposes of this Australian Standard, are deleted. Where text, tables or figures are added, each is set in its proper place and identified by shading (**example**). Added figures are not themselves shaded, but are identified by a shaded border.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text 'IEC 60204-11' should read 'AS 60204.11'.
- (c) A full point should be substituted for a comma when referring to a decimal marker.

The terms 'normative' and 'informative' are used to define the application of the annex to which they apply. A normative annex is an integral part of a standard, whereas an informative annex is only for information and guidance.

CONTENTS

	<i>Page</i>
Introduction	v
1 Scope	1
2 Normative references	2
3 Definitions	4
4 General requirements	10
4.1 General considerations	10
4.2 Selection of electrical equipment	11
4.3 Electrical supply	11
4.4 Physical environment and operating conditions	11
4.5 Transportation and storage	12
4.6 Provisions for handling	12
4.7 Installation	12
5 Incoming supply conductor terminations, devices for disconnecting and switching off, and means for earthing	12
5.1 Incoming supply conductor terminations	12
5.2 Supply disconnecting (isolating) devices and means for earthing	12
5.3 Devices for switching off for prevention of unexpected start-up	14
5.4 Devices for disconnecting and means for earthing HV equipment	15
5.5 Protection against unauthorized, inadvertent and/or mistaken operation	15
6 Protection against electric shock	15
6.1 General	15
6.2 Protection against direct contact	16
6.3 Protection against indirect contact	16
7 Protection of HV equipment	18
7.1 General	18
7.2 Overcurrent protection	18
7.3 Earth fault protection	19
7.4 Protection against overvoltages due to lightning and to switching surges	20
7.5 Protection against other abnormal conditions	20
8 Equipotential bonding	20
8.1 General	20
8.2 Protective bonding circuit	21
9 Control circuits and control functions	24
10 Operator interface and machine-mounted control devices	24
11 Electronic equipment	24
12 Controlgear: location, mounting, and enclosures	24
12.1 General requirements	24
12.2 Location and mounting	25
12.3 Degrees of protection	25
12.4 Enclosures, doors and openings	26
12.5 Access to HV equipment	27
