

Australian Standard™

**Fire detection and alarm systems**

**Part 2: Control and indicating  
equipment  
(ISO 7240-2:2003, MOD)**

This Australian Standard was prepared by Committee FP-002, Fire Detection, Warning, Control and Intercom Systems. It was approved on behalf of the Council of Standards Australia on 1 December 2003 and published on 29 April 2004.

---

The following are represented on Committee FP-002:

Audio Engineering Society  
Australasian Fire Authorities Council  
Australian Building Codes Board  
Australian Chamber of Commerce and Industry  
Australian Electrical and Electronic Manufacturers Association  
Australian Government Analytical Laboratories, Scientific Services Laboratory  
Australian Industry Group  
Australian Institute of Building Surveyors  
Deafness Forum of Australia  
Department of Defence (Australia)  
Fire Protection Association Australia  
Institute of Security Executives  
National Electrical and Communications Association  
Property Council of Australia

---

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at [www.standards.com.au](http://www.standards.com.au) and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at [mail@standards.org.au](mailto:mail@standards.org.au), or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

---

*This Standard was issued in draft form for comment as DR 03321.*

## PREFACE

This Standard was prepared by the Standards Australia Committee FP-002, Fire Detection, Warning, Control and Intercom Systems to supersede AS 4428.1—1998, *Fire detection, warning, control and intercom systems, Part 1: Control and indicating equipment*. The Committee intends to withdraw AS 4428.1—1998 five years after the publication of this Standard.

This Standard has been adopted with national modifications and has been reproduced from ISO 7240-2:2003, *Fire protection and fire alarm systems—Part 2: Control and indicating equipment*. The national modifications are specified in Annex ZA.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text ‘this International Standard’ should read ‘this Australian Standard’.
- (c) A full point should be substituted for a comma when referring to a decimal marker.

References to International standards should be replaced by references to Australian or Australian/New Zealand Standards as follows:

<i>References to International Standard or other Publication</i>		<i>Australian/New Zealand Standard</i>

The term ‘normative’ and ‘informative’ are used in this Standard to define the application of the annex to which they apply. A ‘normative’ annex is an integral part of a standard, whereas an ‘informative’ annex is only for information and guidance.

## CONTENTS

<b>Introduction</b> .....	<b>v</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>2</b>
<b>4 General requirements</b> .....	<b>4</b>
<b>5 General requirements for indications</b> .....	<b>4</b>
<b>6 Quiescent condition</b> .....	<b>5</b>
<b>7 Fire alarm condition</b> .....	<b>6</b>
<b>8 Supervisory signal condition — Optional function</b> .....	<b>10</b>
<b>9 Fault warning condition (see also Annex F)</b> .....	<b>12</b>
<b>10 Disabled condition — Optional function</b> .....	<b>15</b>
<b>11 Test condition — Optional function</b> .....	<b>16</b>
<b>12 Standardized input/output interface — Optional function (see also Annex H)</b> .....	<b>17</b>
<b>13 Design requirements</b> .....	<b>18</b>
<b>14 Additional design requirements for software-controlled control and indicating equipment</b> .....	<b>22</b>
<b>15 Marking</b> .....	<b>23</b>
<b>16 Tests</b> .....	<b>24</b>
<b>Annex A (informative) Explanation of access levels</b> .....	<b>34</b>
<b>Annex B (informative) Optional functions with requirements and alternatives</b> .....	<b>36</b>
<b>Annex C (informative) Processing of signals from fire detectors</b> .....	<b>37</b>
<b>Annex D (informative) Explanation of zones and zonal indication of fire alarms</b> .....	<b>38</b>
<b>Annex E (informative) Delays to outputs</b> .....	<b>39</b>
<b>Annex F (informative) Systems related to the supervisory signal condition</b> .....	<b>41</b>
<b>Annex G (informative) Fault recognition and indication</b> .....	<b>42</b>
<b>Annex H (informative) Standardized input/output interface for the connection of ancillary equipment (e.g. fire brigade panel)</b> .....	<b>43</b>
<b>Annex I (informative) Integrity of transmission paths</b> .....	<b>44</b>
<b>Annex J (informative) Design requirements for software-controlled control and indicating equipments</b> .....	<b>45</b>
