

Australian Standard<sup>®</sup>

## **Fire detection and alarm systems**

### **Part 11: Manual call points (ISO 7240-11:2005, MOD)**

This Australian Standard® was prepared by Committee FP-002, Fire Detection, Warning, Control and Intercom Systems. It was approved on behalf of the Council of Standards Australia on 18 December 2007.

This Standard was published on 27 February 2008.

---

The following are represented on Committee FP-002:

- Audio Engineering Society
  - Australasian Fire Authorities Council
  - Australian Building Codes Board
  - Australian Chamber of Commerce and Industry
  - Australian Electrical and Electronic Manufacturers Association
  - Australian Industry Group
  - Australian Institute of Building Surveyors
  - CSIRO Materials Science and Engineering
  - Deafness Forum of Australia
  - Department of Defence (Australia)
  - Fire Protection Association Australia
  - Institute of Security Executives
  - National Electrical and Communications Association
  - National fire Industry Association
  - Property Council of Australia
- 

This Standard was issued in draft form for comment as DR 03310.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

---

### **Keeping Standards up-to-date**

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **[www.standards.org.au](http://www.standards.org.au)**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **[mail@standards.org.au](mailto:mail@standards.org.au)**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

## PREFACE

This Standard was prepared by Standards Australia Committee FP-002, Fire Detection, Warning, Control and Intercom Systems.

This Standard has been adopted with national modifications and has been reproduced from ISO 7240-11:2005, *Fire detection and alarm systems*, Part 11: *Manual call points*.

Variations to ISO 7240-11:2005 are indicated at the appropriate places throughout this standard. Strikethrough (~~example~~) identifies ISO text, tables and figures which, for the purposes of this Australian Standard, are deleted. Where text, tables or figures are added, each is set in its proper place and identified by shading (example). Added figures are not themselves shaded, but are identified by a shaded border.

The objective of this Standard is to provide the requirements and methods of test for manual call points in fire detection and fire alarm systems in and around buildings. The Standard does not cover manual call points that are intrinsically safe for use in hazardous conditions.

Committee FP-002 intends to review the applicability of AS 1603.5, *Automatic fire detection and alarm systems*, Part 5, *Manual call points* after the publication of this Standard.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text 'this International Standard' should read 'this Australian Standard'.
- (c) A full point should be substituted for a comma when referring to a decimal marker.

The term 'normative' has been used in this Standard to define the application of the annex to which it applies. A 'normative' annex is an integral part of a Standard.

The term 'informative' has been used in this Standard to define the application of the appendix to which it applies. An 'informative' appendix is only for information and guidance.

<b>Contents</b>	<b>Page</b>
Introduction .....	iv
1    Scope.....	1
2    Normative references .....	1
3    Terms and definitions .....	2
4    Requirements .....	3
5    Tests .....	11
6    Test report .....	29
Annex A (normative) Test apparatus for test of operation .....	31
Annex B (informative) Test apparatus for test for non-operation .....	33
Annex C (informative) Apparatus for impact test.....	34
