STANDARDS
Australia

Petroleum and natural gas industries — Offshore production installations — Requirements and guidelines for emergency response

AS ISO 15544:2022

This Australian Standard ® was prepared by ME-092, Materials, equipment, structures and related services for petroleum, petrochemical and natural gas industries. It was approved on behalf of the Council of Standards Australia on 15 April 2022.

This Standard was published on 13 May 2022.

The following are represented on Committee ME-092:

- Australian Industry Group
- Australian Organisation for Quality
- Australian Petroleum Production and Exploration Association
- Australian Pipelines and Gas Association
- Department for Energy and Mining, SA
- Department of Mines, Industry Regulation and Safety WA
- DNV-GL Oil and Gas
- Energy Safe Victoria
- Engineers Australia
- National Energy Resources Australia
- Resources Safety & Health Queensland
- University of Western Australia

This Standard was issued in draft form for comment as DR AS ISO 15544:2022.

Preface

This Standard was prepared by the Standards Australia Committee ME-092, Materials, equipment, structures and related services for petroleum, petrochemical and natural gas industries.

The objective of this document is to describe the functional requirements and guidelines for emergency response (ER) measures on installations used for the development of offshore hydrocarbon resources. It is applicable to fixed offshore structures or floating production, storage and off-take systems.

This document is identical with, and has been reproduced from, ISO 15544:2000, *Petroleum and natural gas industries — Offshore production installations — Requirements and guidelines for emergency response* and its Amendment No. 1 (2009) which has been added at the end of the source text.

As this document has been reproduced from an International document, the following apply:

- (a) In the source text “this International Standard” should read “this document”.
- (b) A full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

Contents

Preface	ii
Foreword	v
Introduction	vi
1 Scope	1
2 Terms, definitions and abbreviated terms	1
2.1 Terms and definitions	1
2.2 Abbreviated terms	4
3 Framework for emergency response	5
4 Emergency response strategy (ERS)	6
4.1 Objectives	6
4.2 Functional requirements	6
4.3 Guidelines	6
5 Emergency response plan (ERP)	7
5.1 Objective	7
5.2 Functional requirements	7
5.3 Guidelines	7
6 Command and control	8
6.1 Objectives	8
6.2 Functional requirements	8
6.3 Guidelines	9
7 Detection of the need for emergency response	9
7.1 Objective	9
7.2 Functional requirements	9
7.3 Guidelines	9
8 Competence	10
8.1 Objectives	10
8.2 Functional requirements	10
8.3 Guidelines	10
9 Maintenance of emergency response equipment	11
9.1 Objective	11
9.2 Functional requirements	11
9.3 Guidelines	12
10 Communications	12
10.1 Objectives	12
10.2 Functional requirements	12
10.3 Guidelines	13
11 Escape, refuge, evacuation and rescue	13
11.1 Objectives	13
11.2 Functional requirements	14
11.3 Guidelines	14
12 Environmental emergency response	15
12.1 Objective	15
12.2 Functional requirements	15
12.3 Guidelines	15
13 Medical emergency response	16
13.1 Objectives	16
13.2 Functional requirements	16
13.3 Guidelines	16
