Schedule

Fire safety requirements for components of furniture

1 Scope

This specification deals with the fire safety requirements for components of furniture including upholstered furniture, mattresses, bed bases, cushions and pillows intended for private use in a dwelling, with particular reference to the type of filling material and cover material which may be used.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

I.S. 254:1983, *Flame resistance requirements for upholstery*

I.S. 418, *Ignitability requirements of mattresses tested with secondary ignition sources simulating unknown bedcovers*

I.S. EN 1021-1:2006, *Furniture - Assessment of the ignitability of upholstered furniture - Part 1: Ignition source smouldering cigarette*

I.S. EN 1021-2:2006, *Furniture - Assessment of the ignitability of upholstered furniture - Part 2: Ignition source match flame equivalent*

3 Terms and definitions

For the purposes of this Irish Standard, the following terms and definitions apply.

filling

main upholstery material contained by the outer cover and (if used) the inner cover

NOTE It can consist of several different materials including any inner cover nominally greater than 2 mm thick

flaming

undergoing combustion in the gaseous phase with the emission of light

inner cover

thin layer of material used between the outer cover and the upholstery filling

NOTE 1 Any inner cover greater than nominally 2 mm thick is part of the filling for test purposes.

NOTE 2 The term "interliner" is no longer used because it is non-specific and has been applied to different components within the composite.

outer cover

outer layer of the upholstery
