# SLURRY TRANSPORTATION PIPING SYSTEMS

**ASME B31.11-2002**  
(Revision of ASME B31.11-1989)

**ASME CODE FOR PRESSURE PIPING, B31**

Date of Issuance: May 30, 2003

Mandatory Date: November 28, 2003

The next edition of this Standard is scheduled for publication in 2007. There will be no addenda issued to this edition.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Standard. Interpretations are published on the ASME Web site under the Committee Pages at <http://www.asme.org/codes/> as they are issued.

Periodically certain actions of the ASME B31 Committee will be published as Cases. While these Cases do not constitute formal revisions of the Code, they may be used in specifications, or otherwise, as representing considered opinions of the Committee. The Cases are not part of the Code and are published separately.

The user of the Code will note that metric equivalents of U.S. Customary units appear in many places in this Code. The values stated in U.S. Customary units are to be regarded as the standard, unless otherwise agreed between the contracting parties.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assumes any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,  
in an electronic retrieval system or otherwise,  
without the prior written permission of the publisher.

# CONTENTS

Foreword .....	v
Committee Personnel .....	vi
Introduction .....	viii
Summary of Changes .....	x
<b>Chapter I</b>	
<b>Scope and Definitions</b> .....	1
1100 General Statements .....	1
<b>Chapter II</b>	
<b>Design</b> .....	5
<b>Part 1 Conditions and Criteria</b> .....	5
1101 Design Conditions .....	5
1102 Design Criteria .....	6
<b>Part 2 Pressure Design of Piping Components</b> .....	9
1103 Criteria for Pressure Design of Piping Components .....	9
1104 Pressure Design of Components .....	9
<b>Part 3 Design Applications of Piping Components Selection and Limitations</b> .....	20
1105 Pipe .....	20
1106 Fittings, Elbows, Bends, and Intersections .....	20
1107 Valves .....	21
1108 Flanges, Blanks, Flange Facings, Gaskets, and Bolting .....	22
1109 Used Piping Components and Equipment .....	23
<b>Part 4 Selection and Limitation of Piping Joints</b> .....	23
1111 Welded Joints .....	23
1112 Flanged Joints .....	23
1114 Threaded Joints .....	23
1118 Sleeve, Coupled, and Other Proprietary Joints .....	23
<b>Part 5 Expansion, Flexibility, Structural Attachments, Supports, and Restraints</b> .....	23
1119 Expansion and Flexibility .....	23
1120 Loads on Equipment .....	28
1121 Design of Pipe Supporting Elements .....	28
<b>Part 6 Other Specific Piping</b> .....	28
1122 Design Requirements .....	28
<b>Chapter III</b>	
<b>Materials</b> .....	29
1123 Materials — General Requirements .....	29
1125 Materials Applied to Miscellaneous Parts .....	29
<b>Chapter IV</b>	
<b>Dimensional Requirements</b> .....	32
1126 Dimensional Requirements for Standard and Nonstandard Piping Components .....	32
<b>Chapter V</b>	
<b>Construction, Welding, and Assembly</b> .....	34
1134 Construction .....	34
1135 Assembly of Piping Components .....	43
<b>Chapter VI</b>	
<b>Inspection and Testing</b> .....	45
1136 Inspection .....	45
1137 Testing .....	46

<b>Chapter VII</b>	<b>Operation and Maintenance Procedures</b> .....	49
	1150 Operation and Maintenance Procedures Affecting the Safety of Slurry Transportation Piping Systems .....	49
	1151 Pipeline Operation and Maintenance .....	49
	1152 Pump Station, Terminal, and Storage Operation and Maintenance.....	53
	1153 Corrosion-Erosion Control.....	54
	1154 Emergency Plan .....	54
	1155 Records.....	54
	1156 Qualifying a Piping System for a Higher Operating Pressure.....	54
	1157 Abandoning a Piping System.....	55
<b>Chapter VIII</b>	<b>Corrosion and Erosion Control</b> .....	56
	1160 General.....	56
	1161 External Corrosion — Buried or Submerged Pipelines.....	56
	1162 External Corrosion — Piping Exposed to Atmosphere.....	59
	1163 Internal Erosion–Corrosion Control.....	59
	1166 Records.....	60
<b>Mandatory Appendices</b>		
I	Referenced Standards .....	61
II	Submittal of Technical Inquiries to the B31 Pressure Piping Committee .....	63
<b>Index</b> .....		65
<b>Figures</b>		
1104.3.1(b)(3)	Reinforced Extruded Outlets .....	13
1104.3.1(c)(1)	Welding Details for Opening With Complete Encirclement Types of Reinforcement .....	15
1104.3.1(c)(2)	Welding Details for Openings With Localized Type Reinforcement.....	16
1104.3.1(c)(3)	Welding Details for Openings Without Reinforcement Other Than That in Header and Branch Walls .....	17
1104.3.1(d)(2)	Reinforcement of Branch Connections .....	18
1119.6.4(c)	Flexibility Factor, <i>k</i> , and Stress Intensification Factor, <i>i</i> .....	25
1134.8.6(a)-(1)	Acceptable Butt Welded Joint Design for Equal Wall Thicknesses.....	38
1134.8.6(a)-(2)	Acceptable Butt Welded Joint Design for Unequal Wall Thicknesses.....	39
1134.8.6(b)	Recommended Attachment Details of Flanges.....	41
1151.6.2(a)(7)	Parameters Used in Analysis of the Strength of Corroded Areas .....	51
<b>Tables</b>		
1102.3.1(a)	Tabulation of Examples of Allowable Stresses for Reference Use in Piping Systems Within the Scope of This Code .....	8
1102.4.3	Weld Joint Factor, <i>E</i> .....	10
1104.3.1(c)	Design Criteria for Welded Branch Connections.....	17
1106.2.1(b)	Minimum Radius of Field Cold Bends.....	20
1123.1	Material and Dimensional Standard .....	30
1126.1	Dimensional Standards.....	33
1134.6(a)	Minimum Cover for Buried Pipelines.....	35
1137.6.5	Minimum Number of Test Welds.....	47
1137.6.6	Minimum Number of Tensile Tests.....	48
