Steam Turbines

Performance Test Codes

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

Three Park Avenue • New York, NY 10016

Date of Issuance: October 31, 2005

This Code will be revised when the Society approves the issuance of a new edition. There will be no addenda issued to ASME PTC 6-2004.

ASME issues written replies to inquiries as code cases and interpretations of technical aspects of this document. Code cases and interpretations are published on the ASME Web site under the Committee Pages at <http://www.asme.org/codes/> as they are issued.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assumes any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

CONTENTS

Notice	vii
Foreword	viii
Committee Roster	x
Correspondence With the PTC 6 Committee	xii
Section 1 Object and Scope	1
1-1 Object	1
1-2 Scope	1
1-3 Full-Scale and Alternative Tests	1
1-4 Conformance to Code	2
1-5 Additional Requirements and References	2
Section 2 Definitions and Description of Terms	3
2-1 Symbols	3
2-2 Abbreviations	3
2-3 Subscripts	4
2-4 Definitions	6
2-5 Table for Conversion to SI Units	6
Section 3 Guiding Principles	7
3-1 Planning for Test	7
3-2 Items on Which Agreement Shall be Reached	7
3-3 Timing of Acceptance Test	8
3-4 General Test Requirements	9
3-5 Isolation of the Cycle	10
3-6 Location of Turbine Valve Points	11
3-7 Number of Test Runs	12
3-8 Testing Conditions	12
3-9 Frequency of Observations and Duration of Test Runs	14
3-10 Calibration of Instruments	15
3-11 Steam Pressure and Temperature Measurements	17
3-12 Corrections	17
3-13 Methods of Comparing Test Results	17
3-14 Tolerances	19
Section 4 Instruments and Methods of Measurement	20
4-1 General	20
4-2 Measurement of Mechanical Output	21
4-3 Measurement of Feedwater Pump Power	22
4-4 Measurement of Electrical Power	24
4-5 A-C Generator Test Instruments	27
4-6 D-C Generator Test Instruments	28
4-7 Calibration of Electrical Instruments	29
4-8 Primary Flow Measurement	29
4-9 Installation of Flow Section	38
4-10 Flow Characteristics	45
4-11 Other Flow-Measuring Devices	45
4-12 Measurement of Steam Flow	45
4-13 Measurement of Water Flow Using Tanks	45
4-14 Differential-Pressure Measurements	46
4-15 Enthalpy-Drop Method for Steam-Flow Determination	48

4-16	Additional Flow Measurements	49
4-17	Measurement of Pressure	51
4-18	Measurement of Temperature	57
4-19	Methods of Determining Steam Quality	59
4-20	Measurement of Speed	64
4-21	Measurement of Time	64
4-22	Measurement of Water Levels	64
Section 5 Computation of Results		65
5-1	Deviations From Specified Operating Conditions	65
5-2	Test Results	65
5-3	Test Data Reduction	65
5-4	Throttle-Steam Flow	66
5-5	Capability	66
5-6	Steam Rate	66
5-7	Heat Rate	66
5-8	Correction of the Test Results to Specified Conditions	67
5-9	Calculation of Turbine Exhaust Steam Enthalpy	67
5-10	Turbine Efficiency and Effectiveness	70
5-11	Calculation of Group 1 Corrections	71
5-12	Calculation of Group 2 Corrections	71
5-13	Average Performance	72
Section 6 Report of Tests		73
6-1	Turbine Generator Acceptance Test Reports	73
Section 7 Required Number of Readings		74
7-1	Introduction	74
7-2	Illustrations	74
7-3	Effect of Flow Nozzle Differentials	74
7-4	Effect of Throttle Steam Temperature	75
7-5	Combining Readings From More Than One Sensor or Instrument	76
7-6	Estimated Effect of all Readings for the Entire Test Period	76
7-7	Development of Fig. 3-1	76
7-8	Standard Deviation	76
7-9	Discussion on Fig. 7-1	76
7-10	Standard Deviation of the Averages	76
7-11	Uncertainty Limit	76
7-12	Formula for $N_R = \bar{N}_a$ Line in Fig. 3-1	80
7-13	Development of N_a Lines in Fig. 3-1	81
Section 8 Group 1 Corrections for the Alternative Procedure		82
8-1	Corrections to Specified Conditions	82
8-2	Cycle Parameters	82
8-3	Correction Factor Curves	82
8-4	Sample Group 1 Correction Curves for Fossil Units	82
8-5	Sample Group 1 Correction Curves for Nuclear Units	86
Section 9 Rationale for Heat Rate Testing Uncertainty		91
9-1	Object	91
9-2	Scope	91
9-3	Heat Rate Test	91
9-4	Measurement Errors	91
9-5	Variations	91
9-6	Uncertainty Values	91
9-7	Typical Test Uncertainty Calculations	91
