OF

SPECIFICATION

ENTITLED

FIBRE OPTIC BRANCHING DEVICES

(GENERIC SPECIFICATION)

AS

THE IRISH STANDARD SPECIFICATION FOR

FIBRE OPTIC BRANCHING DEVICES

(GENERIC SPECIFICATION)

Forfás in exercise of the power conferred by section 20 (3) of the Industrial Research and Standards Act, 1961 (No. 20 of 1961) and the Industrial Development Act, 1993 (No. 19 of 1993), and with the consent of the Minister for Enterprise and Employment, hereby declares as follows:

1. This instrument may be cited as the Standard Specification (Fibre Optic Branching Devices (Generic Specification)) Declaration, 1994.
2. (1) The Specification set forth in the Schedule to this declaration is hereby declared to be the standard specification for Fibre Optic Branching Devices (Generic Specification). The Schedule comprises the text of EN 181000 : 1994.

(2) The said standard specification may be cited as Irish Standard/EN 181000:1994 or as I.S./EN 181000:1994.

EUROPEAN STANDARD
NORME EUROPÉENNE
EUROPÄISCHE NORM

EN 181 000

July 1994

UDC

Descriptors: Quality, electronic components, fibre optic branching devices

English version

Generic Specification:
Fibre Optic Branching Devices

Spécification générique:
Coupleurs à fibres optiques

Fachgrundspezifikation:
Faseroptische Verzweiger

This European Standard was approved by the CENELEC Electronic Components Committee (CECC) on 27 January 1992. CENELEC members are bound to comply with CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the General Secretariat of the CECC or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CECC General Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and United Kingdom. The membership of the CECC is identical, with the exception of the national electrotechnical committees of Greece, Iceland and Luxembourg.

General Secretariat: Gartenstr. 179, D - 60596 Frankfurt am Main

FOREWORD

The CENELEC Electronic Components Committee (CECC) is composed of those member countries of the European Committee for Electrotechnical Standardization (CENELEC) who wish to take part in a harmonized System for electronic components of assessed quality.

The object of the System is to facilitate international trade by the harmonization of the specifications and quality assessment procedures for electronic components, and by the grant of an internationally recognized Mark, or Certificate, of Conformity. The components produced under the System are thereby acceptable in all member countries without further testing.

This specification was prepared by CECC WG 27.

The text of the draft based on document CECC (Secretariat)2755 was submitted to the formal vote; together with the voting report, circulated as document CECC(Secretariat)3001, it was approved by CECC as EN 181 000 on 27 January 1992.

The following dates were fixed:

-	latest date of announcement of the EN at national level	(doa)	1993 - 01 - 12
-	latest date of publication of an identical national standard	(dop)	1993 - 07 - 12
-	latest date of declaration of national standards obsolescence		1993 - 07 - 12
-	latest date of withdrawal of conflicting national standards	(dow)	2003 - 01 - 12

CONTENTS

Clause	Page
FOREWORD.....	2

SECTION ONE - GENERAL

1.	General	7
1.1	Scope	7
1.2	Related documents	7
1.3	Definitions	9

SECTION TWO - REQUIREMENTS

2.	Requirements	16
2.1	Classification	16
2.1.1	Type	16
2.1.2	Style.....	16
2.1.3	Variant.....	18
2.1.4	Climatic category	18
2.1.5	Assessment level	19
2.2	Minimum mandatory test sequence.....	20
2.3	Documentation.....	21
2.3.1	Symbols.....	21
2.3.2	Specification system.....	22
	Blank detail specifications.....	23
	Detail specifications.....	23
2.3.3	Drawings.....	23
	Projection system	23
	Dimensional system.....	23
	Intermountability.....	23
2.3.4	Measurements.....	24
	Measurement method.....	24
	Reference components.....	24
	Gauges.....	24
2.3.5	Test data sheets	24
2.3.6	Instructions for use.....	24
2.4	Design and construction.....	25
2.4.1	Materials.....	25
2.4.2	Workmanship.....	25
2.5	Quality.....	25
2.6	Performance requirements.....	25
2.7	Identification and marking.....	25
2.7.1	Variant identification number.....	25
2.7.2	Component marking.....	26
2.7.3	Package marking.....	26
2.8	Packaging.....	27
2.9	Ordering information.....	27

SECTION THREE - QUALITY ASSESSMENT PROCEDURES

3.	Quality assessment procedures.....	28
3.1	Primary stage of manufacture.....	28
3.2	Structural similarity.....	28
3.3	Qualification approval procedures.....	28
3.3.1	Fixed sample procedure.....	29
3.3.2	Lot-by-lot and periodic procedure.....	29
3.3.3	Sample size.....	29
3.3.4	Preparation of specimens.....	29
3.3.5	Qualification testing.....	29
3.3.6	Qualification failures.....	30
3.3.7	Maintenance of qualification approval.....	30
3.3.8	Qualification report.....	30
3.4	Quality conformance inspection.....	30
3.4.1	Lot-by-lot inspection	31
	Formation of inspection lots.....	31
	Rejected lots.....	31
3.4.2	Periodic inspection.....	31
	Sample size.....	32
	Preparation of specimens.....	32
	Periodic inspection.....	32
	Periodic inspection failures.....	32
	Periodic inspection report.....	32
3.5	Certified records of released lots.....	33
3.6	Delayed deliveries.....	33
3.7	Delivery release before completion of group B4 tests	33
3.8	Alternative test methods.....	33
3.9	Unchecked parameters.....	33

SECTION FOUR - MEASUREMENT AND ENVIRONMENTAL TEST PROCEDURES

4.	Measurement and environmental test procedures...	34
4.1	Standard conditions.....	34
4.2	Specimen.....	34
4.3	Cleaning of optical surfaces.....	34
4.4	Optical measurement conditions.....	34
4.5	Measurement procedures.....	36
4.5.1	Visual inspection.....	37
4.5.2	Dimensions and mass.....	37
4.5.3	Examination of product.....	38
4.5.4	Flammability.....	39
4.5.5	Insertion loss	40
4.5.6	Return loss.....	47
4.5.7	Wavelength dependence measurement.....	51
4.5.8	Polarization dependence of the transfer matrix.....	56
4.5.9	Change in transmitted optical power.....	57
4.5.10	Maximum input power.....	61
4.6	Environmental test procedures.....	63
4.6.1	Vibration.....	64
4.6.2	Effectiveness of fibre or ferrule retention.....	66
4.6.3	Static load.....	67
4.6.4	Pulling.....	68
4.6.5	Torsion.....	69
