EUROPÄISCHE NORM

EN 168 000

March 1993

+ A1

March 1993

UDC

Supersedes CECC 68 000 Issue 1 : 1989

Descriptors: Quality, electronic components, quartz crystal units

English version

Generic Specification:
Quartz Crystal Units
(Includes Amendment A1 : 1993)

Spécification générique:
Résonateurs à quartz
(Inclut l'amendement A1 : 1993)

Fachgrundspezifikation:
Schwingquarze
(Einschließlich Änderung
A1 : 1993)

This European Standard was approved by the CENELEC Electronic Components Committee (CECC) on 14 January 1992. CENELEC members are bound to comply with CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the General Secretariat of the CECC or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CECC General Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and United Kingdom. The membership of the CECC is identical, with the exception of the national electrotechnical committees of Greece, Iceland and Luxembourg.

CECC

General Secretariat: Gartenstr. 179, W- 6000 Frankfurt/Main 70

FOREWORD

The CENELEC Electronic Components Committee (CECC) is composed of those member countries of the European Committee for Electrotechnical Standardization (CENELEC) who wish to take part in a harmonized System for electronic components of assessed quality.

The object of the System is to facilitate international trade by the harmonization of the specifications and quality assessment procedures for electronic components, and by the grant of an internationally recognized Mark, or Certificate, of Conformity. The components produced under the System are thereby acceptable in all member countries without further testing.

This European Standard was prepared by CECC WG 17, Piezoelectric devices for frequency control and selection.

The text of the draft based on document CECC 68 000 Issue 1 : 1989 (with A1) and CECC(Secretariat)2851 was submitted to the formal vote for conversion to a European Standard; together with the voting report, circulated as document CECC(Secretariat)2961 it was approved by CECC as EN 168 000 on 14 January 1992.

The following dates were fixed:

- latest date of announcement of the EN at national level	(doa)	1992-12-08
- latest date of publication of an identical national standard	(dop)	1993-06-08
- latest date of declaration of national standards obsolescence		1993-06-08
- latest date of withdrawal of conflicting national standards	(dow)	2002-12-08

3.9 Screening requirements

Where screening is required by the customer for quartz crystal units this shall be specified in the detail specification.

3.10 Rework and repair work

3.10.1 Rework

Rework is the rectification of processing errors and shall not be carried out if prohibited by the sectional specification. The sectional specification shall state if there is a restriction on the number of occasions that rework may take place on a specific component.

All rework shall be carried out prior to the formation of the inspection lot offered for inspection to the requirements of the detail specification.

Such rework procedures shall be fully described in the relevant documentation produced by the manufacturer and shall be carried out under the direct control of the Chief Inspector. Sub-contracting of rework is not permitted.

3.10.2 Repair work

Repair work is the correction of defects in a component after release to the customer.

Components that have been repaired can no longer be considered as representative of the manufacturer's production and may not be released under the CECC system.

3.11 Certified test records

The requirements of §2 of CECC 00 109 shall apply. When certified test records (RCE) are prescribed in the sectional specification for qualification approval and are requested by the customer the results of the specified tests shall be summarised.

3.12 Delayed delivery

Crystal units held for a period exceeding two years following acceptance inspection shall be reinspected for the electrical tests detailed in 4.7.1 and 4.7.3, with a sample tested as described in 4.8.3(1), prior to release.

3.13 Release for delivery

Quartz crystal units shall be released in accordance with §14 of CECC 00 107 Part I.
