EUROPÄISCHE NORM

EN 160200-1

December 1997

Descriptors: Modular electronic units, capability approval, sectional specification

English version

Sectional Specification:
Microwave modular electronic units of assessed quality
Part 1: Capability approval procedure

Rahmenspezifikation:
Elektronische Mikrowellenmodule mit
bewerteter Qualität
Teil 1: Befähigungsanerkennung

This European Standard was approved by CENELEC on 1994-04-15. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This sectional specification has been prepared by the United Kingdom under the single originator procedure for approval and publication of CECC specifications (see RP 11: Part V). It is to be used for the assessment of Microwave Modular Electronic Units (MMEUs) within the CECC capability approval scheme. The content is in accordance with the generic specification for Modular Electronic Units (MEUs); EN 160000 and meets the requirements of Rule of Procedure 14 (RP 14).

This sectional specification is based, wherever possible, on the publications of the International Electrotechnical Commission.

It includes, as (blank) examples, formats for a capability qualifying component specification and customer's detail specification (CDS).

The use of this sectional specification is as follows:

- a) a potential customer makes an enquiry to the manufacturer for a Microwave Modular Electronic Unit within the scope of his capability published in CECC 00200;
- b) the specification is negotiated between the manufacturer and the customer, until an agreed customer's detail specification is finalized;
- c) the Microwave Modular Electronic Unit is inspected and released in accordance with the agreed Customer's Detail Specification.

In order to facilitate the review of the document, the 'index of electrical test methods' has been published as Part 2 of this sectional specification.

The text of the draft based on document CECC(Secretariat)3317 was submitted to the formal vote; together with the voting report, circulated as document CECC(Secretariat)3522, it was approved as EN 160200-1 on 1994-04-15.

The following dates were fixed:

- | | |
|--|------------------|
| - latest date by which the EN has to be implemented at national level by publication of an identical national standard or by endorsement | (dop) 1998-06-01 |
| - latest date by which the national standards conflicting with the EN have to be withdrawn | (dow) 1999-06-01 |
-

Contents	Page
Section 1: General matters	6
1.1 Scope	6
1.2 Related documents	7
1.3 Units, symbols and terminology	8
1.3.1 Microwave modular electronic unit (MMEU)	8
1.3.2 Components	8
1.4 Standard and preferred values	8
1.4.1 Preferred climatic categories	8
1.4.2 Preferred interfaces and fixings	9
1.5 Marking	9
Section 2: Quality Assessment procedures	10
2.1 General	10
2.1.1 Eligibility for capability approval	10
2.1.2 Primary stage of manufacture	10
2.1.3 Sub-contracting	10
2.1.4 Incorporated components	10
2.1.5 Structurally similar units	11
2.1.6 Validity of release	11
2.1.7 Rework	11
2.1.8 Repair	11
2.1.9 Resubmission of rejected lots (for lot-by-lot inspection)	12
2.2 Procedure for capability approval	12
2.2.1 Application for capability approval	12
2.2.2 Granting of a capability approval	12
2.2.3 Description of capability (capability manual)	13
2.2.4 Capability qualifying components (CQCs)	14
2.2.5 Demonstration and verification of capability	18
2.2.6 Procedures to be followed in the event of CQC failure	22
2.2.7 Abstract of description of capability	22
2.3 Procedures following the granting of capability approval	22
2.3.1 Maintenance of capability approval	22
2.3.2 Procedures to be followed in the event of CQC failure	23
2.3.3 Modifications likely to affect the validity of the capability approval	23
2.3.4 Extension of capability approval	23

EN 160200-1:1997

Contents (continued)	Page
2.4 Release for delivery	23
2.4.1 Quality conformance inspection requirements	23
2.4.2 Customer detail specification	24
2.4.3 Detail specification for standard catalogue items to be included in the QPL	24
Section 3: Test and measurement procedures	25
3.1 General	25
3.2 Standard conditions for testing	25
3.2.1 Standard atmospheric conditions	25
3.2.2 Electrical measurements	26
3.3 Alternative test methods	28
3.4 Measurement uncertainty	29
3.5 Visual inspection, dimensions/gauging and mass test methods	29
3.6 Environmental, mechanical and endurance test methods	29
3.7 Electrical and performance test methods	30
Tables	
1 Test schedule for demonstration of limits of capability approval	31
2 Test schedule for demonstration of process control and maintenance of capability approval	34
3 Supplementary process controls	37
Annexes	
A.1 Generic process flow chart - Process	38
A.2 Process flow chart - Waveguide technology	39
A.3 Process flow chart - Ferrite technology	40
A.4 Process flow chart - Substrate line and component technology	41
A.5 Process flow chart - Diode/transistor and complex circuit technology	42
B Capability approval test report	43
