Foreword

This European Standard was prepared by the German national committee under supervision of the Technical Committee CENELEC TC 59X, Consumer information related to household electrical appliances.

It describes test methods for checking the performance of hydraulic, closed electrical instantaneous water heaters for household use and other criteria which are of particular importance for the consumer. For the time being it does not deal with the measuring of energy consumption.

The text of the draft was submitted to the formal vote and was approved by CENELEC as EN 50193 on 1996-12-09.

The following dates were fixed:

-	latest date by which the EN has to be implemented at national level by publication of an identical national standard or by endorsement	(dop)	1997-12-01	
-	latest date by which national standards conflicting with the EN have to be withdrawn	(dow)	1997-12-01	

Annexes designated "normative" are part of the body of the standard. In this standard, annex A is normative.
