EUROPEAN STANDARD
NORME EUROPÉENNE
EUROPÄISCHE NORM

EN 14092

February 2002

ICS 49.140

English version

Space engineering - Space environment

Ingénierie spatiale - Environnement spatial

Raumfahrttechnik (Engineering) -
Raumfahrtumweltbedingungen

This European Standard was approved by CEN on 26 December 2001.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Contents

	page
Foreword.....	10
Introduction	11
1 Scope.....	12
2 Normative references	12
3 Terms, definitions and abbreviated terms	12
3.1 Terms and definitions.....	12
3.2 Abbreviated terms	18
4 Gravitation	20
4.1 Introduction.....	20
4.1.1 Newton's law of gravitation	20
4.1.2 Departures from the point-mass model.....	21
4.1.3 Accurate representation of the geopotential	21
4.2 Model presentation.....	23
4.2.1 Model.....	23
4.2.2 Mandatory model parameters	23
4.2.3 Guidelines for use	23
4.3 Reference data.....	23
4.3.1 Model output	23
4.3.2 Results for typical missions.....	23
4.4 References	25
5 Geomagnetic fields.....	25
5.1 Introduction – Overview of the geomagnetic field and effects	25
5.2 Reference data on the geomagnetic field	26
5.3 Geomagnetic field models and analysis methods.....	26
5.3.1 Dipole model	26
5.3.2 Internal-source field models.....	27
5.3.3 Eccentric dipole model.....	27
5.3.4 Geomagnetic coordinates – B and L	28
5.3.5 External-source field models.....	30
5.3.6 Magnetospheric boundaries.....	30
5.4 Tailoring guidelines	31
5.5 Figures	32
5.6 References	33
6 Solar and Earth electromagnetic radiation and indices.....	34
6.1 Introduction.....	34
6.2 Solar electromagnetic radiation.....	35
6.2.1 Solar constant	35
6.2.2 Solar spectrum	35
6.3 Earth electromagnetic radiation	36
6.3.1 Earth albedo.....	36
6.3.2 Earth infrared	36
6.4 Solar and geomagnetic indices.....	37

6.4.1	General	37
6.4.2	Description of indices	37
6.4.3	Solar cycle dependence	37
6.4.4	Reference index values	41
6.4.5	Tailoring guidelines	41
6.5	Figures	42
6.6	References	42
7	The neutral Earth atmosphere	42
7.1	Introduction	42
7.2	Recommended reference model	43
7.3	Structure of the Earth atmosphere	43
7.4	Atmospheric state parameters	43
7.5	Temperature, composition, and density model of the Earth heterosphere	44
7.6	Temperature, composition, and density model of the Earth homosphere	53
7.7	Reference model output	54
7.8	Wind model of the Earth homosphere and heterosphere	54
7.9	Simple density models of planetary atmospheres	55
7.10	Aerodynamics in the Earth atmosphere	56
7.11	Figures	58
7.12	References	65
8	Plasmas	65
8.1	Introduction	65
8.2	The ionosphere	66
8.2.1	Description	66
8.2.2	Effects	67
8.2.3	Models	67
8.2.4	Typical and worst case parameters	68
8.3	The plasmasphere	69
8.3.1	Description	69
8.3.2	Effects	69
8.3.3	Models	69
8.3.4	Typical parameters	70
8.4	The outer magnetosphere	70
8.4.1	Description	70
8.4.2	Effects	71
8.4.3	Models	72
8.4.4	Typical and worst case parameters	72
8.5	The solar wind	73
8.5.1	Description	73
8.5.2	Effects	73
8.5.3	Models	73
8.6	Induced environments	74
8.6.1	Description	74
8.6.2	Effects	74
8.6.3	Models	74
8.6.4	Typical parameters	75
8.7	Tailoring guidelines	75
8.8	References	76

EN 14092:2002 (E)

9	Energetic particle radiation	77
9.1	Introduction – Overview of energetic particle radiation environment and effects	77
9.1.1	General.....	77
9.1.2	Environments	77
9.1.3	Effects survey.....	78
9.2	Quantification of effects and related environments.....	78
9.3	Energetic particle radiation environment reference data, models and analysis methods.....	79
9.3.1	Trapped radiation belts	79
9.3.2	Solar particle event models.....	82
9.3.3	Cosmic ray environment and effects models	85
9.3.4	Geomagnetic shielding.....	85
9.3.5	Spacecraft secondary radiation	86
9.3.6	Neutrons.....	86
9.4	Analysis methods for derived quantities	87
9.4.1	General.....	87
9.4.2	Ionizing dose	87
9.4.3	Reference orbital dose data.....	88
9.4.4	Single-event upset rate	88
9.4.5	Solar cell degradation	89
9.4.6	Internal electrostatic charging	89
9.4.7	Dose-equivalent	89
9.4.8	Non-ionizing dose	89
9.5	Tailoring guidelines: Orbital and mission regimes	90
9.5.1	General.....	90
9.5.2	Geostationary orbit.....	90
9.5.3	MEO, HEO	90
9.5.4	LEO	90
9.5.5	Polar	90
9.5.6	Interplanetary and planetary environments	90
9.6	Preparation of a radiation environment specification	91
9.7	Figures	92
9.8	References	107
10	Particulates	108
10.1	Introduction.....	108
10.2	Analysis techniques	108
10.3	Model presentation.....	110
10.3.1	Meteoroids	110
10.3.2	Space debris	112
10.3.3	Dust.....	113
10.4	Reference data.....	113
10.4.1	Trackable space debris	113
10.4.2	Statistical flux models.....	114
10.5	Figures	119
10.6	References	123
11	Contamination.....	123
11.1	Introduction.....	123
11.2	Molecular contamination	124
11.2.1	Sources of molecular contamination.....	124
11.2.2	Transport mechanisms	125
