February 2002

ICS 49.140

English version

Space engineering - Space environment

Ingénierie spatiale - Environnement spatial

Raumfahrttechnik (Engineering) -  
Raumfahrtumweltbedingungen

This European Standard was approved by CEN on 26 December 2001.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

<b>Foreword.....</b>	<b>10</b>
<b>Introduction .....</b>	<b>11</b>
<b>1 Scope.....</b>	<b>12</b>
<b>2 Normative references .....</b>	<b>12</b>
<b>3 Terms, definitions and abbreviated terms .....</b>	<b>12</b>
<b>3.1 Terms and definitions.....</b>	<b>12</b>
<b>3.2 Abbreviated terms.....</b>	<b>18</b>
<b>4 Gravitation .....</b>	<b>20</b>
<b>4.1 Introduction.....</b>	<b>20</b>
<b>4.1.1 Newton's law of gravitation .....</b>	<b>20</b>
<b>4.1.2 Departures from the point-mass model.....</b>	<b>21</b>
<b>4.1.3 Accurate representation of the geopotential .....</b>	<b>21</b>
<b>4.2 Model presentation.....</b>	<b>23</b>
<b>4.2.1 Model.....</b>	<b>23</b>
<b>4.2.2 Mandatory model parameters .....</b>	<b>23</b>
<b>4.2.3 Guidelines for use .....</b>	<b>23</b>
<b>4.3 Reference data.....</b>	<b>23</b>
<b>4.3.1 Model output .....</b>	<b>23</b>
<b>4.3.2 Results for typical missions.....</b>	<b>23</b>
<b>4.4 References .....</b>	<b>25</b>
<b>5 Geomagnetic fields .....</b>	<b>25</b>
<b>5.1 Introduction – Overview of the geomagnetic field and effects .....</b>	<b>25</b>
<b>5.2 Reference data on the geomagnetic field .....</b>	<b>26</b>
<b>5.3 Geomagnetic field models and analysis methods.....</b>	<b>26</b>
<b>5.3.1 Dipole model .....</b>	<b>26</b>
<b>5.3.2 Internal-source field models .....</b>	<b>27</b>
<b>5.3.3 Eccentric dipole model .....</b>	<b>27</b>
<b>5.3.4 Geomagnetic coordinates – <i>B</i> and <i>L</i>.....</b>	<b>28</b>
<b>5.3.5 External-source field models.....</b>	<b>30</b>
<b>5.3.6 Magnetospheric boundaries.....</b>	<b>30</b>
<b>5.4 Tailoring guidelines .....</b>	<b>31</b>
<b>5.5 Figures .....</b>	<b>32</b>
<b>5.6 References .....</b>	<b>33</b>
<b>6 Solar and Earth electromagnetic radiation and indices.....</b>	<b>34</b>
<b>6.1 Introduction.....</b>	<b>34</b>
<b>6.2 Solar electromagnetic radiation.....</b>	<b>35</b>
<b>6.2.1 Solar constant .....</b>	<b>35</b>
<b>6.2.2 Solar spectrum .....</b>	<b>35</b>
<b>6.3 Earth electromagnetic radiation .....</b>	<b>36</b>
<b>6.3.1 Earth albedo .....</b>	<b>36</b>
<b>6.3.2 Earth infrared .....</b>	<b>36</b>
<b>6.4 Solar and geomagnetic indices .....</b>	<b>37</b>

6.4.1	General .....	37
6.4.2	Description of indices .....	37
6.4.3	Solar cycle dependence.....	37
6.4.4	Reference index values .....	41
6.4.5	Tailoring guidelines .....	41
6.5	Figures .....	42
6.6	References.....	42
7	The neutral Earth atmosphere.....	42
7.1	Introduction.....	42
7.2	Recommended reference model.....	43
7.3	Structure of the Earth atmosphere .....	43
7.4	Atmospheric state parameters .....	43
7.5	Temperature, composition, and density model of the Earth heterosphere .....	44
7.6	Temperature, composition, and density model of the Earth homosphere .....	53
7.7	Reference model output.....	54
7.8	Wind model of the Earth homosphere and heterosphere .....	54
7.9	Simple density models of planetary atmospheres .....	55
7.10	Aerodynamics in the Earth atmosphere.....	56
7.11	Figures .....	58
7.12	References.....	65
8	Plasmas .....	65
8.1	Introduction.....	65
8.2	The ionosphere .....	66
8.2.1	Description .....	66
8.2.2	Effects .....	67
8.2.3	Models.....	67
8.2.4	Typical and worst case parameters .....	68
8.3	The plasmasphere .....	69
8.3.1	Description .....	69
8.3.2	Effects .....	69
8.3.3	Models.....	69
8.3.4	Typical parameters .....	70
8.4	The outer magnetosphere.....	70
8.4.1	Description .....	70
8.4.2	Effects .....	71
8.4.3	Models.....	72
8.4.4	Typical and worst case parameters .....	72
8.5	The solar wind.....	73
8.5.1	Description .....	73
8.5.2	Effects .....	73
8.5.3	Models.....	73
8.6	Induced environments.....	74
8.6.1	Description .....	74
8.6.2	Effects .....	74
8.6.3	Models.....	74
8.6.4	Typical parameters .....	75
8.7	Tailoring guidelines .....	75
8.8	References.....	76

**EN 14092:2002 (E)**

9	Energetic particle radiation .....	77
9.1	Introduction – Overview of energetic particle radiation environment and effects .....	77
9.1.1	General.....	77
9.1.2	Environments .....	77
9.1.3	Effects survey.....	78
9.2	Quantification of effects and related environments.....	78
9.3	Energetic particle radiation environment reference data, models and analysis methods.....	79
9.3.1	Trapped radiation belts .....	79
9.3.2	Solar particle event models.....	82
9.3.3	Cosmic ray environment and effects models .....	85
9.3.4	Geomagnetic shielding.....	85
9.3.5	Spacecraft secondary radiation .....	86
9.3.6	Neutrons.....	86
9.4	Analysis methods for derived quantities .....	87
9.4.1	General.....	87
9.4.2	Ionizing dose .....	87
9.4.3	Reference orbital dose data.....	88
9.4.4	Single-event upset rate .....	88
9.4.5	Solar cell degradation .....	89
9.4.6	Internal electrostatic charging .....	89
9.4.7	Dose-equivalent .....	89
9.4.8	Non-ionizing dose .....	89
9.5	Tailoring guidelines: Orbital and mission regimes .....	90
9.5.1	General.....	90
9.5.2	Geostationary orbit.....	90
9.5.3	MEO, HEO .....	90
9.5.4	LEO .....	90
9.5.5	Polar .....	90
9.5.6	Interplanetary and planetary environments .....	90
9.6	Preparation of a radiation environment specification .....	91
9.7	Figures .....	92
9.8	References .....	107
10	Particulates .....	108
10.1	Introduction.....	108
10.2	Analysis techniques .....	108
10.3	Model presentation.....	110
10.3.1	Meteoroids .....	110
10.3.2	Space debris .....	112
10.3.3	Dust .....	113
10.4	Reference data.....	113
10.4.1	Trackable space debris .....	113
10.4.2	Statistical flux models.....	114
10.5	Figures .....	119
10.6	References .....	123
11	Contamination .....	123
11.1	Introduction.....	123
11.2	Molecular contamination .....	124
11.2.1	Sources of molecular contamination.....	124
11.2.2	Transport mechanisms .....	125
