English version

Air quality - Approach to uncertainty estimation for ambient air reference measurement methods

This CEN Report was approved by CEN on 10 November 2001. It has been drawn up by the Technical Committee CEN/TC 264.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Contents

Foreword.....	4
1 Introduction	5
2 Assumptions and interpretations in this Report of the EC Air Quality Framework and Daughter Directives	5
2.1 Annexes to the Daughter Directives	5
2.2 Definitions and interpretation of measurement uncertainty, level of confidence, and confidence interval, within the Ambient Air Quality Daughter Directives	6
2.2.1 General.....	6
2.2.2 Uncertainty of measurement	6
2.2.3 Level of confidence	6
2.2.4 Relationship between confidence interval and measurement uncertainty	7
2.3 EC Terms of Reference	8
3 Approaches to uncertainty estimation	8
3.1 General.....	8
3.2 Guide to the Expression of Uncertainty in Measurement.....	9
3.3 International Standards ISO 5725 Parts 1 to 6.....	9
3.4 International Vocabulary of Basic and General Terms in Metrology.....	10
3.5 Other International Standards	10
4 Recommendations for the assessment of uncertainty of ambient air measurement methods	11
4.1 Introduction	11
4.1.1 General.....	11
4.1.2 Automated measurement methods.....	11
4.1.3 Non-automated measurement methods	12
4.1.4 Utilisation of traceable calibration standards and certified reference materials	13
4.1.5 Specification of the regime of field calibrations and QA/QC procedures.....	13
4.2 Consistent approach to the assessment of uncertainty in the Ambient Air Quality Daughter Directives	13
4.2.1 General.....	13
4.2.2 General types of test procedures to be employed	14
4.2.3 Examples of the approach to uncertainty estimation given in this Report	18
4.2.4 Applicability of the general types of tests.....	18
5 Requirements for on-going quality assurance and quality control of field measurements covered by the EC Directives	18
5.1 Overview of requirements.....	18
5.2 Specific requirements of the Framework Directive.....	18
5.3 Types of organisations involved.....	19
5.4 Requirement for traceability to national or international accepted standards	19
5.5 Demonstration of the competence of organisations involved with QA/QC activities	20
5.6 The role of quality assurance and quality control for the on-going field measurements	20
5.7 Procedures for the regular auditing of the performance of laboratories involved in QA/QC activities.....	21
5.8 Conclusions.....	22
6 General philosophy for the development of future ambient air measurement methods	22
Annex A Principles of the Reference Methods prescribed in the EC Air Quality Daughter Directives	23
Annex B Data quality objectives contained in the Ambient Air Quality Daughter Directive covering benzene and carbon monoxide	24
Annex C Reference measurement methods for the implementation of EU Air Quality Directives	25
Annex D Examples illustrating the approach specified in this Report for uncertainty estimation for ambient air measurement methods	27
Annex E Definitions of measurement uncertainty terms used in this Report.....	35

Annex F Outline description of a methodology for a proficiency testing scheme which could be used to underpin European harmonisation of ambient air quality measurements.....	36
Annex G Members of the Ad-hoc Group on an approach to uncertainty estimation for ambient air measurement methods	38
Annex H Acknowledgements	39
Bibliography	40

CR 14377:2002 (E)

Foreword

This Technical Report has been prepared by Technical Committee CEN/TC 264, "Air quality", the secretariat of which is held by DIN.

This document is a working document.

This CEN Report has been prepared by an Ad-Hoc-Group of CEN/TC 264 "Air quality" in co-operation with the European Commission's Joint Research Centre, Ispra, Italy.

This CEN Report is an informative document.
