OF

SPECIFICATION

ENTITLED

ELECTROMAGNETIC COMPATIBILITY – BASIC IMMUNITY STANDARD – CONDUCTED
DISTURBANCES INDUCED BY RADIO-FREQUENCY FIELDS – IMMUNITY TEST

AS

THE IRISH STANDARD SPECIFICATION FOR

ELECTROMAGNETIC COMPATIBILITY – BASIC IMMUNITY STANDARD – CONDUCTED
DISTURBANCES INDUCED BY RADIO-FREQUENCY FIELDS – IMMUNITY TEST

Forfás in exercise of the power conferred by section 20 (3) of the Industrial Research and Standards Act, 1961 (No. 20 of 1961) and the Industrial Development Act, 1993 (No. 19 of 1993), and with the consent of the Minister for Enterprise and Employment, hereby declares as follows:

1. This instrument may be cited as the Standard Specification (Electromagnetic Compatibility – Basic Immunity Standard – Conducted Disturbances Induced by Radio-Frequency Fields – Immunity Test) Declaration, 1994.
2. (1) The Specification set forth in the Schedule to this declaration is hereby declared to be the standard specification for Electromagnetic Compatibility – Basic Immunity Standard – Conducted Disturbances Induced by Radio-Frequency Fields – Immunity Test. The Schedule comprises the text of ENV 50141 : 1993.

(2) The said standard specification may be cited as Irish Standard/ENV 50141:1994 or as I.S./ENV 50141:1994.

UDC 621.37.001.365:620.1:621.317.08

Descriptors: Electromagnetic compatibility, electric equipment, conducted disturbances, electromagnetic fields, tests, severity

English Version

Electromagnetic compatibility - Basic immunity
standard - Conducted disturbances induced by
radio-frequency fields - Immunity test

This European Prestandard (ENV) was approved by CENELEC on 1993-05-12 as a prospective standard for provisional application. The period of validity of this ENV is limited initially to three years. After two years the members of CENELEC will be requested to submit their comments, particularly on the question whether the ENV can be converted into a European Standard (EN).

CENELEC members are required to announce the existence of this ENV in the same way as for an EN and to make the ENV available promptly at national level in an appropriate form. It is permissible to keep conflicting national standards in force (in parallel to the ENV) until the final decision about the possible conversion of the ENV into an EN is reached.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

CONTENTS

1	Scope	3
2	Normative references	3
3	General	4
4	Definitions	4
5	Test levels	6
6	Test equipment	6
6.1	Test generator	6
6.2	Coupling and decoupling devices	7
6.2.1	Direct injection	8
6.2.2	Coupling and decoupling networks	8
6.2.2.1	Coupling and decoupling to (power) supply lines	8
6.2.2.2	Coupling and decoupling to unscreened balanced lines	8
6.2.2.3	Coupling and decoupling to unscreened non-balanced lines	9
6.2.3	Clamp injection	9
6.2.3.1	Current clamp	9
6.2.3.2	EM-clamp	10
6.2.3.3	EM-clamp with decoupling network	10
6.2.4	Decoupling network	10
6.3	Verification of the common-mode impedance at the EUT-port of coupling and decoupling devices	10
6.3.1	Coupling factor of the "150-to-50 Ω adaptors"	11
6.4	Setting of the test generator	11
6.4.1	Setting of the output level at the EUT-port of the coupling devices	11
6.5	Calibration of clamp injection devices	12
7	Test set-up for table top and floor standing equipment	12
7.1	EUT comprising a single unit	12
7.2	EUT comprising several units	12
7.3	Rules for selecting test points and injection methods	13
7.4	Guidance for proper clamp injection application	14
8	Test procedure	15
9	Test results and test report	16

Figures

Annexes

Annex A1	(informative) : Selection criteria for the frequency range of application	27
Annex A2	(informative) : Guide for selecting test levels	29
Annex A3	(informative) : Additional information on coupling and decoupling networks	30
A3.1	: Basic features of the coupling and decoupling networks	30
A3.2	: List of coupling and decoupling networks	31
A3.3	: Examples and construction details of the coupling and decoupling networks	31
Annex A4	(informative) : Additional information for the test generator specification	33
Annex A5	(Informative) : Additional information for the clamp injection method when using the EM-clamp	34
Annex B1	(normative) : Calibration of current injection probe	38
