EUROPEAN STANDARD

NORME EUROPÉENNE

EUROPÄISCHE NORM

April 2004

ICS 29.130.20

English version

Low-voltage switchgear and controlgear assemblies – General requirements for low-voltage substation cable distribution boards

Ensembles d'appareillage à basse tension -Règles générales pour les tableaux de poste basse tension Niederspannungs-Schaltgerätekombinationen – Allgemeine Anforderungen an Niederspannungsverteilungen in Netzstationen

This European Standard was approved by CENELEC on 2004-03-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This European Standard was prepared by the Technical Committee CENELEC TC 17D, Low-voltage switchgear and controlgear assemblies.

The text of the draft was submitted to the formal vote and was approved by CENELEC as EN 50300 on 2004-03-01.

This European Standard is to be used in conjunction with EN 60439-1:1999.

The following dates were fixed:

_	latest date by which the EN has to be implemented at national level by publication of an identical national standard or by endorsement	(dop)	2005-03-01
_	latest date by which the national standards conflicting with the EN have to be withdrawn	(dow)	2007-03-01

Introduction

The clauses of this standard supplement, modify or replace clauses in EN 60439-1:1999, Low-voltage switchgear and controlgear assemblies - Part 1: Type-tested and partially type-tested assemblies.

Where there is no corresponding clause or subclause in this standard, the clause or subclause of the main document applies without modification.

In view of the fact that this publication is to be read in conjunction with EN 60439-1, the numbering of its clauses and subclauses correspond with the latter.

Subclauses, figures and tables which are additional to those in EN 60439-1 are numbered starting from 101.

1 General

1.1 Scope and object

This standard gives supplementary requirements for low voltage switchgear and controlgear assemblies for public distribution transforming sub-stations. They are stationary, type tested assemblies (TTA) for installation in places where only authorised persons have access for their use, however, outdoor types may be installed in situations which may be accessible to the public.

They are connected to the low voltage terminals of distribution transformers by means of connecting bars, rods or cables and are for use in low voltage public three phase systems.

Individual components such as fuses and switching devices complying with other standards, shall also comply with the supplementary requirements of this standard.

The object of this standard is to state the definitions and to specify the service conditions, construction requirements, technical characteristics and tests for Substation Cable Distribution Boards. Network parameters may require type tests at higher performance levels.

NOTE Where local regulations and practices permit, a Substation Cable Distribution Board to this standard may be used in other than public networks as agreed between the manufacturer and the user.

1.2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 60068-2-11:1999	Environmental testing Part 2: Tests - Test Ka: Salt mist (IEC 60068-2-11:1981)
EN 60068-2-30:1999	Environmental testing Part 2: Tests - Test Db and guidance: Damp heat, cyclic (12 + 12 hour cycle) (IEC 60068-2-30:1980 + A1:1985)
EN 60238:1998	Edison screw lampholders (IEC 60238:1998)
EN 60269-1:1989	Low-voltage fuses Part 1: General requirements (IEC 60269-1:1986)
EN 60439-1:1999	Low-voltage switchgear and controlgear assemblies Part 1: Type-tested and partially type-tested assemblies (IEC 60439-1:1999)
