EUROPEAN STANDARD

EN 14824

NORME EUROPÉENNE

EUROPÄISCHE NORM

December 2003

ICS 49.140

English version

Space engineering - Testing

Raumfahrttechnik - Tests

This European Standard was approved by CEN on 1 October 2003.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Slovakia, Spain, Sweden, Switzerland and United Kingdom.

Foreword.....	6
1 Scope	7
2 Normative references	7
3 Terms, definitions and abbreviated terms	8
3.1 Terms and definitions.....	8
3.2 Abbreviated terms	12
4 General requirements.....	15
4.1 Testing philosophy	15
4.2 Model philosophy.....	16
4.3 Development testing.....	17
4.4 Qualification testing	17
4.5 Acceptance testing	18
4.6 Protoflight testing	18
4.7 Retesting.....	19
4.8 Test conditions and tolerances	20
4.9 Operations validation testing	25
4.10 Test data	30
4.11 Test documentation.....	30
5 Qualification testing	32
5.1 Equipment test requirements	32
5.2 Subsystem test requirements.....	72
5.3 Element test requirements.....	73
5.4 System qualification test.....	91
6 Acceptance testing	91
6.1 Equipment test requirements	91
6.2 Subsystem test requirements.....	102
6.3 Element test requirements.....	103
6.4 System test requirements	108
7 Protoflight testing	108
7.1 Equipment test requirements	108
7.2 Subsystem test requirements.....	109
7.3 Element test requirements.....	109
7.4 System test requirements	110
8 Pre-launch testing.....	110
8.1 General.....	110
8.2 Functional tests.....	111
8.3 Propulsion tests	111
8.4 Integrated launch system test	111
8.5 Manned related tests	111
9 In-orbit testing.....	112
10 Post-landing testing	113
Annex A (informative) Mechanical and vibration testing for space equipment.....	114
A.1 Derivation of qualification test levels for units from mechanical test data analysis.....	114
A.1.1 Introduction	114
A.1.2 Unit level random testing	116
A.1.3 Unit level sinusoidal testing	117
A.1.4 References.....	117
A.2 Vibration test philosophy.....	117
A.3 Technical information on mechanical test factors	119

A.3.1	Introduction	119
A.3.2	References.....	119
A.3.3	Loads	120
A.3.4	Margin of safety	120
A.4	Microgravity environment compatibility (MEC).....	120
A.4.1	Introduction	120
A.4.2	Disturbance source definition	121
A.4.3	MEC control approach.....	121
Annex B	(informative) Temperature limits and test levels for space equipment.....	124
B.1	Introduction	124
B.2	References.....	124
B.3	Influence of equipment temperature limits on thermal design.....	124
B.4	Verification by analysis concerning accuracy and level of confidence.....	125
B.4.1	General philosophy of uncertainty application	125
B.4.2	Temperature uncertainty determination.....	127
B.4.3	Quantification of uncertainty values.....	129
B.4.4	Test correlation criteria	130
B.5	Standardization of equipment temperature limits.....	131
B.5.1	Evaluation and classification of equipment data	131
B.5.2	Standardization approach.....	131
B.6	Standardization of thermal vacuum and cycling test conditions	132
B.6.1	Evaluation of test requirements	132
B.6.2	Standardization approach.....	132
B.7	Conclusions	136
Annex C	(normative) Test requirement specification - DRD.....	138
C.1	Introduction	138
C.2	Scope and applicability	138
C.2.1	Scope	138
C.2.2	Applicability.....	138
C.3	References.....	138
C.3.1	Glossary and dictionary	138
C.3.2	Source document.....	138
C.4	Terms and definitions and abbreviations.....	138
C.4.1	Terms and definitions.....	138
C.4.2	Abbreviations	138
C.5	Description and purpose	139
C.6	Application and interrelationship.....	139
C.7	Test requirement specification preliminary elements	139
C.7.1	Title.....	139
C.7.2	Title page	139
C.7.3	Contents list	139
C.7.4	Foreword.....	139
C.7.5	Introduction	140
C.8	Content	140
C.8.1	Scope and applicability	140
C.8.2	References.....	140
C.8.3	Definitions and abbreviations	141
C.8.4	General test conditions and requirements	141
C.8.5	Qualification testing	141
C.8.6	Acceptance testing	142
C.8.7	Protoflight testing	142
C.8.8	Re-testing methodology.....	142
C.8.9	GSE testing.....	142
Bibliography	143
