Introduction

This European Standard has been prepared in order to specify the general design criteria for spectator facilities (permanent, movable, demountable and telescopic), with the purpose of enabling their functionality. Within the standard minimum and recommended values for dimensions are occasionally presented. It should be recognised that these values are to be considered as values that in part recognise different national requirements as a basic provision.

Attention is drawn to the fact that in certain Countries additional/different requirements may be applicable due to existing national regulations or equivalent.

In certain countries the minimum number of spectators is related to the application of this standard.

Safety management does not form a part of this standard.
