Supersedes EN 1256:1996

English Version

**Gas welding equipment - Specification for hose assemblies for
equipment for welding, cutting and allied processes**

Matériel de soudage aux gaz - Spécifications relatives aux
assemblages des tuyaux souples sur les douilles porte-
tuyaux pour matériel de soudage, coupage et techniques
connexes

Gasschweißgeräte - Festlegungen für Schlauchleitungen
für Ausrüstungen für Schweißen, Schneiden und verwandte
Prozesse

This European Standard was approved by CEN on 16 December 2005.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This European Standard (EN 1256:2006) has been prepared by Technical Committee CEN/TC 121 "Welding", the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by August 2006, and conflicting national standards shall be withdrawn at the latest by August 2006.

This European Standard supersedes EN 1256:1996.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

EN 1256:2006 (E)

1 Scope

This European Standard specifies performance and test requirements of hose assemblies, if supplied in assembled condition for equipment for gas welding, cutting and allied processes using rubber hoses in compliance with EN 559.

This European Standard is not applicable to hose assemblies where the hoses are not in compliance with EN 559 (e.g. high pressure hoses).

2 Normative references

The following referenced documents are indispensable for the application of this European Standard. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 559, *Gas welding equipment — Rubber hoses for welding, cutting and allied processes*

EN 560, *Gas welding equipment — Hose connections for equipment for welding, cutting and allied processes*

EN 29090, *Gas tightness of equipment for gas welding and allied processes (ISO 9090:1989)*

EN 29539, *Materials for equipment used in gas welding, cutting and allied processes (ISO 9539:1988)*

3 Terms and definitions

For the purposes of this European Standard, the following terms and definitions apply.

3.1

hose assembly

assembly consisting of a hose tail inserted into the end of a hose and secured by a suitable hose mounting device against sliding off (see Figure 1)

3.2

hose tail

end of a coupling device (e.g. nipple/nozzle) to be inserted into a hose

3.3

hose mounting device

non-detachable component such as ferrule or hose clip, which prevents sliding off of the hose from the hose tail

3.4

ferrule

metallic component providing frictional connection between sleeve, hose and hose tail by means of pressing

3.5

hose clip

metallic component providing frictional connection between sleeve, hose and hose tail by means of clamping

3.6

mounting area

area on the hose tail where the hose mounting device is positioned
