Foreword

This document (CEN/TR 15160:2005) has been prepared by Technical Committee CEN/TC 19 “Gaseous and liquid fuels, lubricants and related products of petroleum, synthetic and biological origin”, the secretariat of which is held by NEN.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association.

CEN/TR 15160:2005 (E)

Introduction

This Technical Report gives the results of the round robin series of tests to evaluate different test methods on their compatibility on FAME which are referred to in:

- EN 14213: *Heating fuels – Fatty acid methyl esters (FAME) – Requirements and test methods*, and
- EN 14214: *Automotive fuels – Fatty acid methyl esters (FAME) for diesel engines – Requirements and test methods*.

CEN/TC 19 acknowledges Mrs. M.F. Benassy from Total, all project leaders of each test method as indicated in the annexes and all other participants in CEN/TC 19/WG 26 "FAME related fuel test methods" (see Annex A) for their contribution to this report.
