Cranes - General design - Part 3-2: Limit states and proof of competence
of wire ropes in reeving systems

Appareils de levage à charge suspendue -
Conception générale - Partie 3-2 : États
limites et vérification d'aptitude des
systèmes de mouflage

Krane - Konstruktion allgemein - Teil 3-2:
Grenzzustände und Sicherheitsnachweis
von Drahtseilen in Seiltrieben

This corrigendum becomes effective on 5 July 2006 for incorporation in the three official language
versions of the EN.

Ce corrigendum prendra effet le 5 juillet 2006 pour incorporation dans les trois versions linguistiques
officielles de la EN.

Die Berichtigung tritt am 5.Juli 2006 zur Einarbeitung in die drei offiziellen Sprachfassungen der EN in
Kraft.

CEN/TS 13001-3-2:2004/AC:2006 (E/F/D)

English version

Clause 2

Replace normative reference "ENV 1990-1:2002, Eurocode - Basic of structural design." by "EN 1990:2002, Eurocode - Basis of structural design"

Replace normative reference "CEN/TS 13001-3.2, Cranes — General design — Part 3-2: Limit states and proof of competence of wire ropes in reeving systems." by "CEN/TS 13001-3-1, Cranes — General design — Part 3-1: Limit states and proof of competence of steel structures"

Clause 3.1

Replace
"EN 1990-1:2002" by "EN 1990:2002"

Version française

Clause 2

Remplacer la référence normative "ENV 1990-1:2002, Eurocodes structuraux : Bases de calcul des structures" par "EN 1990:2002, Eurocodes structuraux - Bases de calcul des structures"

Remplacer la référence normative « CEN/TS 13001-3-2, Appareils de levage à charge suspendue – Conception générale – Partie 3-2 : États limites et vérification d'aptitude des systèmes de mouflage. » par « CEN/TS 13001-3-1, Appareils de levage à charge suspendue - Conception générale - Partie 3-1: Etats limites et vérification d'aptitude des structures en acier »

Clause 3.1

Remplacer EN 1990-1:2002" par "EN 1990:2002".

Deutsche Fassung

Abschnitt 2

Die normative Verweisung "EN 1990:2002, Eurocode 1: Grundlagen der Tragwerksplanung und Einwirkungen auf Tragwerke — Teil 1: Grundlagen der Tragwerksplanung." soll ersetzt werden durch "EN 1990:2002, Eurocode: Grundlagen der Tragwerksplanung"

Die normative Referenz "CEN/TS 13001-3.2, Krane Konstruktion allgemein — Teil 3.2: Grenzzustände und Sicherheitsnachweis von Drahtseilen in Seiltrieben." soll ersetzt werden durch "CEN/TS 13001-3-1, Krane — Konstruktion allgemein — Teil 3-1: Grenzzustände und Sicherheitsnachweis von Stahltragwerken"

Abschnitt 5.2.3, Formel 7, Legende

Ersetze " $\eta_s = 0,985 \cdot (1 - 0,15 \cdot d_{bearing} / D_{Sheave})$ "
durch " $\eta_s = 0,985 \times (1 - 0,15 \times d_{bearing} / D_{Sheave})$ "

CEN/TS 13001-3-2

December 2004

ICS 53.020.20

English version

Cranes - General design - Part 3-2: Limit states and proof of competence of wire ropes in reeving systems

Appareils de levage à charge suspendue - Conception générale - Partie 3-2 : États limites et vérification d'aptitude des systèmes de mouflage

Krane - Konstruktion allgemein - Teil 3-2: Grenzzustände und Sicherheitsnachweis von Drahtseilen in Seiltrieben

This Technical Specification (CEN/TS) was approved by CEN on 18 March 2004 for provisional application.

The period of validity of this CEN/TS is limited initially to three years. After two years the members of CEN will be requested to submit their comments, particularly on the question whether the CEN/TS can be converted into a European Standard.

CEN members are required to announce the existence of this CEN/TS in the same way as for an EN and to make the CEN/TS available promptly at national level in an appropriate form. It is permissible to keep conflicting national standards in force (in parallel to the CEN/TS) until the final decision about the possible conversion of the CEN/TS into an EN is reached.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

	Page
Foreword	4
Introduction	5
1 Scope	5
2 Normative references	5
3 Terms, definitions, symbols and abbreviations	6
3.1 Terms and definitions	6
3.2 Symbols and abbreviations	6
4 General	8
5 Proof of static strength	8
5.1 General	8
5.2 Vertical hoisting	8
5.2.1 Design rope force	8
5.2.2 Inertial and gravitational effects	9
5.2.3 Rope reeling efficiency	10
5.2.4 Non parallel falls	11
5.2.5 Horizontal forces on the hoist load	11
5.3 Non vertical drives	12
5.3.1 Design rope force	12
5.3.2 Equivalent force	13
5.3.3 Inertial effects	14
5.3.4 Rope reeling efficiency	14
5.3.5 Non parallel falls	14
5.4 Limit design rope force	14
6 Proof of fatigue strength	15
6.1 General	15
6.2 Design rope force	16
6.2.1 Principle conditions	16
6.2.2 Inertial effects	16
6.2.3 Non parallel falls	17
6.2.4 Horizontal forces in vertical hoisting	18
6.3 Limit design rope force	18
6.3.1 Basic formula	18
6.3.2 Rope force history parameter	18
6.3.3 Rope force spectrum factor	19
6.3.4 Relative total number of bendings	19
6.3.5 Minimum rope resistance factor	20
6.4 Further influences on the limit design rope force	20
6.4.1 Basic formula	20
6.4.2 Diameters of drum and sheaves	20
6.4.3 Tensile strength of wire	21
6.4.4 Fleet angle	21
6.4.5 Rope lubrication	22
6.4.6 Multilayer drum	22
6.4.7 Groove radius	22
6.4.8 Rope types	23
Annex A (normative) Number of Relevant Bendings	24
Annex B (informative) Guidance for selection of design number of hoist ropes used during the useful crane life	27
Annex C (informative) Selection of suitable set of crane standards for a given application	28
Bibliography	29
