EUROPEAN STANDARD

**EN 13063-3**

NORME EUROPÉENNE

EUROPÄISCHE NORM

July 2007

---

ICS 91.060.40

English Version

## Chimneys - System chimneys with clay/ceramic flue liners - Part 3: Requirements and test methods for air flue system chimneys

Conduits de fumées - Conduits-systèmes avec conduit intérieur en terre cuite/céramique - Partie 3 : Exigences et méthodes d'essai pour conduits-systèmes à brassage d'air

Abgasanlagen - System-Abgasanlagen mit Keramik-Innenrohren - Teil 3: Anforderungen und Prüfungen für Luft-Abgasleitungen

This European Standard was approved by CEN on 9 June 2007.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

## **EN 13063-3:2007 (E)**

### **Foreword**

This document (EN 13063-3:2007) has been prepared by Technical Committee CEN/TC 166 "Chimneys", the secretariat of which is held by UNI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by January 2008, and conflicting national standards shall be withdrawn at the latest by April 2009.

This standard is part 3 of a series of standards for system chimneys with clay/ceramic flue liners. Part 1 is for soot fire resistant system chimneys and part 2 is for system chimneys working under wet conditions.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive 89/106.

For relationship with EU Directive(s), see informative Annex ZA, which is an integral part of this document.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

## **1 Scope**

This product standard specifies the requirements and test methods for dry (designated D) and/or wet (designated W) air flue system chimneys, including terminals in which the products of combustion are conveyed to the atmosphere through clay/ceramic flue liners and combustion air is conveyed to suitable room-sealed appliances through an air duct or an air gap.

It also specifies the requirements for marking, manufacturer's instructions, product information and evaluation of conformity.

This standard does not apply to structurally independent (free standing or self supporting) system chimneys.

An air flue system chimney is made of the following components where appropriate:

- clay/ceramic flue liners;
- insulation layer;
- outer walls;
- mortar for jointing flue liners;
- acid resistant mortar or elastomeric sealant for jointing flue liners;
- mortar for jointing outer walls;
- terminal;
- chimney base;
- pressure equalising opening;
- air duct;
- air gap;
- cladding;
- opening section;
- cleaning and inspection door;
- distance piece;
- reinforcement.

The air flue system chimney covers a combination of compatible chimney components obtained or specified from one manufacturing source, with product responsibility for the whole chimney.
