EUROPEAN STANDARD

EN 14373

NORME EUROPÉENNE

EUROPÄISCHE NORM

October 2005

ICS 13.230

English Version

Explosion suppression systems

Systèmes de suppression d'explosion

Explosionsunterdrückungs-Systeme

This European Standard was approved by CEN on 16 August 2005.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Contents

	Page
Foreword	5
1 Scope	6
2 Normative references	6
3 Terms and definitions	7
4 Explosion suppression.....	10
4.1 General	10
4.2 Influencing factors	11
4.2.1 General	11
4.2.2 The explosion hazard	11
4.2.3 The explosion suppressant.....	12
4.2.4 The suppression system	12
4.2.5 Interrelation	12
5 General requirements for explosion suppression components.....	13
5.1 Detection.....	13
5.1.1 General	13
5.1.2 Optical detection.....	13
5.1.3 Pressure detection.....	13
5.2 Suppressant	13
5.3 HRD-suppressors.....	14
5.4 Control and Indicating Equipment, CIE	15
6 Requirements for the design of an explosion suppression system	15
6.1 General	15
6.2 Hazard definition	15
6.3 Determination of the $p_{red, max}$ as a function of relevant influencing parameters	16
6.3.1 General	16
6.3.2 Validation by testing in one volume	16
6.3.3 Validation by testing in a second volume	22
6.3.4 Elongated enclosures	22
6.3.5 Pipes	23
6.3.6 Occupied spaces	23
6.4 Validation of system design guidelines	23
6.4.1 General	23
6.4.2 Design nomograph	24
6.4.3 Mathematical model for design	25
6.5 Special applications	26
6.5.1 Suppression combined with venting	26
6.5.2 Venting combined with suppression	27
6.5.3 Suppression combined with reduced oxygen concentrations	27
6.5.4 Partial volumes	27
6.5.5 Segregated volumes	28
6.5.6 Obstructed volumes	28
6.6 Test report	29
7 Safety integrity of explosion suppression systems	30
7.1 General	30
7.2 Measures to avoid and control systematic faults	30
7.3 Control of electric connections	30
7.4 Indicators and messages CIE	30
7.5 Energy supply	31
8 Instructions for installation, commissioning and maintenance	31

8.1	General	31
8.2	Installation of cables.....	31
8.3	Assembling.....	31
8.3.1	General	31
8.3.2	Assembly	31
8.4	Commissioning	31
8.4.1	General	31
8.4.2	Commissioning phase.....	31
8.4.3	Instruction	31
8.4.4	Commissioning report.....	32
8.4.5	Safety	32
8.5	Maintenance	32
8.5.1	General	32
8.5.2	Servicing.....	32
9	Marking and packaging	32
9.1	General	32
9.2	Explosion suppression system components	33
9.3	Explosion suppression system	34
9.4	Omission of markings	34
Annex A (informative) Development of nomograph type design guidelines		35
A.1	General	35
A.2	Design nomograph	35
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 94/9/EC of 23 March 1994		39
Bibliography.....		42

Figures:

Figure 1 — Pressure behaviour versus time for a normal and suppressed explosion.....	11
Figure 2 — Effectiveness of suppressant.....	14
Figure 3 — Pressure behaviour and pressure rate of pressure rise versus concentration for a normal and suppressed explosion	17
Figure 4 — Maximum reduced explosion pressure, $p_{\text{red}, \text{max}}$ behaviour versus maximum explosion constant, K_{max} . 18	18
Figure 5 — Maximum reduced explosion pressure, $p_{\text{red}, \text{max}}$ behaviour versus activation pressure, p_a	20
Figure 6 — Maximum reduced explosion pressure, $p_{\text{red}, \text{max}}$ behaviour versus number of HRD-suppressors, HRDs 20	20
Figure 7 — Maximum reduced explosion pressure, $p_{\text{red}, \text{max}}$ behaviour versus dispersion agent pressure p_s	21
Figure 8 — Design nomograph for a specific explosion suppression system.....	24
Figure 9 — Calculated maximum reduced explosion overpressure versus measured maximum reduced explosion overpressure for $p_{\text{red}, \text{max}}$ values up to 0,5 bar	25
Figure 10 — Calculated maximum reduced explosion overpressure versus measured maximum reduced explosion overpressure for $p_{\text{red}, \text{max}}$ values above 0,5 bar.....	26
Figure 11 — Example of an enclosure where an explosive concentration prevails only in the lower section	28
Figure A.1— Design nomograph for a specific explosion suppression system	36
Figure A.2 — Design guideline for a fuel range	37
Figure A.3 — Volume limits of the design guideline for a fuel range	37
