EUROPEAN STANDARD

EN 13779

NORME EUROPÉENNE

EUROPÄISCHE NORM

April 2007

ICS 91.140.30

Supersedes EN 13779:2004

English Version

Ventilation for non-residential buildings - Performance requirements for ventilation and room-conditioning systems

Ventilation dans les bâtiments non résidentiels - Exigences de performances pour les systèmes de ventilation et de climatisation

Lüftung von Nichtwohngebäuden - Allgemeine Grundlagen und Anforderungen für Lüftungs- und Klimaanlage

This European Standard was approved by CEN on 26 March 2007.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword	4
Introduction	5
1 Scope.....	6
2 Normative references	6
3 Terms and definitions.....	7
4 Symbols and units	9
5 Agreement of design criteria	10
5.1 General	10
5.2 Principles	10
5.3 General building characteristics	10
5.4 Construction data	11
5.5 Geometrical description	11
5.6 Use of the rooms	11
5.7 Requirements in the rooms	12
5.8 System requirements.....	13
5.9 General requirements for control and monitoring	13
5.10 General requirements for maintenance and safety of operation	13
5.11 Process from project initiation to operation	14
6 Classification	14
6.1 Specification of types of air	14
6.2 Classification of air	16
6.3 System tasks and basic system types.....	21
6.4 Pressure conditions in the room.....	22
6.5 Specific fan power	23
6.6 Heat recovery	24
7 Indoor environment	24
7.1 General	24
7.2 Occupied zone.....	25
7.3 Thermal environment.....	27
7.4 Indoor air quality	28
7.5 Indoor air humidity.....	30
7.6 Acoustic environment	31
Annex A (informative) Guidelines for Good Practice.....	32
Annex B (informative) Economic aspects.....	60

Annex C (informative) Checklist for the design and use of systems with low energy consumption.....	61
Annex D (informative) Calculation and application of Specific Fan Power Calculating and checking the SFP, SFP_E, and SFP_v	64
Annex E (informative) Efficiency of ventilation and air diffusion	71
Bibliography	72

EN 13779:2007 (E)

Foreword

This document (EN 13779:2007) has been prepared by Technical Committee CEN/TC 156 "Ventilation for buildings", the secretariat of which is held by BSI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by October 2007, and conflicting national standards shall be withdrawn at the latest by October 2007.

This document supersedes EN 13779:2004.

This standard has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association (Mandate M/343), and supports essential requirements of EU Directive 2002/91/EC on the energy performance of buildings (EPBD). It forms part of a series of standards aimed at European harmonisation of the methodology for the calculation of the energy performance of buildings. An overview of the whole set of standards is given in CEN/TR 15615, Explanation of the general relationship between various CEN standards and the Energy Performance of Buildings Directive (EPBD) ("Umbrella document").

Attention is drawn to the need for observance of all relevant EU Directives transposed into national legal requirements. Existing national regulations with or without reference to national standards, may restrict for the time being the implementation of the European Standards mentioned in this report.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.
