Page

Foreword.....	4
Introduction	5
1 Scope.....	9
2 Normative references	9
3 Terms, definitions, symbols and units.....	9
3.1 Terms and definitions	9
3.2 Symbols and units.....	15
4 General recommendations	21
4.1 Design objectives	21
4.2 Reliability	21
4.3 Combined use of natural and powered ventilators	22
4.4 Sequence of operation of devices comprising a single SHEVS	23
4.5 Interactions between different smoke zones in a building.....	23
4.6 Sprinkler protection.....	24
4.7 Documentation	24
4.8 Installation, maintenance and safety	26
5 Calculation procedures.....	26
5.1 General	26
5.2 Design regions.....	27
5.3 Additional steps in the calculation.....	28
5.4 Compatibility.....	30
6 Performance recommendations	30
6.1 The fire as a basis for design	30
6.2 Plumes rising directly from the fire into a smoke reservoir	33
6.3 The flow of hot smoky gases out of a fire-room into an adjacent space	34
6.4 The flow of hot smoky gases under a canopy projecting beyond a fire-room's window or opening.....	35
6.5 The spill plume	36
6.6 The smoke reservoir and ventilators	40
6.7 External influences.....	42
6.8 Inlet air (replacement air)	44
6.9 Free-hanging smoke barriers	46
6.10 Suspended ceilings	47
6.11 Atrium depressurization	48
7 Interaction with other fire protection systems and other building systems	50
7.1 Sprinklers.....	50
7.2 Smoke and fire detection systems	50
7.3 Pressure differential systems.....	51
7.4 Public address and voice alarm systems	52
7.5 Lighting and signage.....	52
7.6 Computerized control systems	52
7.7 Heating, ventilation and air-conditioning (HVAC)	53
7.8 Security systems	54
Annex A (informative) Default value heat release rates	55
Annex B (informative) The plume rising directly from the fire into a smoke reservoir.....	56

Annex C (informative) The flow of hot smoky gases out of a fire-room into an adjacent space	60
Annex D (informative) The flow of hot smoky gases under a soffit projecting beyond a fire-room's opening or window	64
Annex E (informative) The spill plume.....	68
Annex F (informative) The smoke reservoir and ventilators.....	69
Annex G (informative) The influence of zones of overpressure and/or zones of suction upon a SHEVS.....	74
Annex H (informative) Deflection of free-hanging smoke barriers	77
Annex I (informative) Plenum chamber	82
Annex J (informative) Atrium depressurization.....	84
Annex K (informative) The interaction of sprinklers, a SHEVS and fire-fighting actions	91
Annex L (informative) The effect of a buoyant layer on the minimum pressure recommended for a pressure differential system	93
Bibliography	96

CEN/TR 12101-5:2005 (E)

Foreword

This CEN Technical Report (CEN/TR 12101-5:2005) has been prepared by Technical Committee CEN/TC 191 "Fixed firefighting systems", the secretariat of which is held by BSI.

This Technical Report supersedes CR 12101-5:2000.

This Technical Report is based on the text of British Standard BS 7346-4:2003.
