Masse und zulässige Abweichungen

This European Standard was accepted by CEN on 1976-06-30. The CEN members are bound to adhere to the CEN Internal Regulations which specify under which conditions this European Standard has to be given, without any alteration, the status of a national standard.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Central Secretariat or to any CEN member.

This European Standard is established by CEN in three official versions (English, French, German). A translation made by another member under its own responsibility, in its own language, and notified to CEN has the same status.

CEN members are the national standards organizations of Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

### Brief history

This European Standard, drawn up by technical committee CEN/TC 50 'Lighting poles and spigots' (secretariat DIN), was submitted to the ballot of CEN members in February 1976 with a view to its adoption as a European Standard.

It was adopted as such by CEN on 30 June 1976 on the strength of its acceptance by the following member countries:

Austria, France, Germany, Ireland, Italy, Netherlands, Portugal, Switzerland, United Kingdom.

### Foreword

In producing this Part of this standard it was recognized that columns with nominal heights and/or bracket projections not specified in this standard will still be needed to replace columns in existing lighting schemes. However, all columns for new lighting schemes should be selected from the nominal heights and bracket projections specified in this document.

### 1. Scope and field application

This European Standard specifies the dimensions and tolerances for a chosen series of lighting columns adopted by CEN. It relates to post top columns for post top lanterns as well as columns with brackets for side entry lanterns.

The dimensional requirements are specified except that the connection dimensions in clause 7 represent, for the time being, a recommended choice. It is proposed to make them mandatory after an interim period.

## Contents

	Page		Page
Brief history	2	6. Flange plate	7
Foreword	2	7. Connection dimensions for lanterns	8
1. Scope and field of application	2	8. Tolerances	9
2. Post top columns, main dimensions	3		
3. Columns with brackets, main dimensions	4	Annex: National particularities	9
4. Door openings and cable entry slots	5		
5. Column foundation, planting depth and base plate	6
