## **I.S. 355 :2006**

### **Foreword**

This standard has been drawn up by the Hurling and Camogie Committee in response to a requirement by Cumann Lúthcleas Gael and Cumann Camógaíochta na nGael and other interested parties.

The intention of helmets is to reduce the risk of injury to the skull and the part of the face surrounded by the protector that may occur in play or training. The protective function is such that the force from impacts against the protector is distributed and damped and the penetration of objects is counteracted.

Helmets for hurling and camogie players shall comprise a head protector and an associated face protector. This standard sets out minimum requirements and test methods.
