Standard Recommendation
S.R. CEN/CLC/ETSI/TR 50572:2011

Functional reference architecture for communications in smart metering systems

S.R. CEN/CLC/ETSI/TR 50572:2011

Incorporating amendments/corrigenda issued since publication:

The National Standards Authority of Ireland (NSAI) produces the following categories of formal documents:

I.S. xxx: Irish Standard – national specification based on the consensus of an expert panel and subject to public consultation.

S.R. xxx: Standard Recommendation - recommendation based on the consensus of an expert panel and subject to public consultation.

SWiFT xxx: A rapidly developed recommendatory document based on the consensus of the participants of an NSAI workshop.

<i>This document replaces:</i>	<i>This document is based on:</i> CEN/CLC/ETSI/TR 50572:2011	<i>Published:</i> 16 December, 2011
This document was published under the authority of the NSAI and comes into effect on: 21 December, 2011		ICS number: 33.200 91.140.01

RAPPORT TECHNIQUE

TECHNISCHER BERICHT

December 2011

ICS 33.200; 91.140.01

English version

Functional reference architecture for communications in smart metering systems

Architecture fonctionnelle de référence
pour les communications dans les
systèmes de comptage intelligent

Funktionale Referenzarchitektur für die
Kommunikation in intelligenten
Messsystemen

This Technical Report was approved by CEN and CENELEC on 2011-12-01.

CEN and CENELEC members are the national standards bodies and national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

Foreword	4
Introduction	5
1 Scope	5
2 Legislative framework	6
2.1 Directives	6
2.2 Metrological considerations	6
2.3 References	7
3 Commonly used terms	7
4 Approach to standardization	12
4.1 Principles	12
4.2 Scope of standardization work	12
4.3 Smart metering in the context of smart grids	13
5 Privacy and data security	14
5.1 Introduction	14
5.2 Privacy and data protection	14
5.2.1 Legislative framework	14
5.2.2 Approach	15
5.3 General security policy and concepts	15
5.3.1 Principles	15
5.3.2 Security concept	16
5.3.3 Tamper resistance	17
5.3.4 Security policy	17
6 Architecture and configurations	17
6.1 Introduction	17
6.2 Scope of architecture	17
6.3 Functional reference architecture	18
6.4 Physical configurations	20
6.5 Description of functional entities	20
6.5.1 Introduction	20
6.5.2 Central communication system / AMI Head End System (HES)	20
6.5.3 Local Network Access Point (LNAP)	20
6.5.4 Neighborhood Network Access Point (NNAP)	21
6.5.5 Metering end devices	21
6.5.6 Display and home automation	22
6.6 Interfaces	22
6.6.1 Introduction	22
6.6.2 AMI Head End System interface (G interface)	22
6.6.3 NNAP interface (C interface)	22
6.6.4 Metering end device interface (M interface)	22
6.6.5 Display and home automation end device interfaces (H1, H2 and H3 interfaces)	23
6.6.6 LNAP / NNAP Peer Interfaces (L and N interfaces)	23
7 Standardization overview and co-ordination between the ESOs	23
8 Currently available communications standards and further standardization	24
8.1 Introduction	24
8.2 Table of existing communications standards and standards to be developed under the mandate	25
8.3 Product standards related to additional functionalities	41
9 Interoperability and conformance	41
9.1 Interoperability	41
9.1.1 Principles	41
9.1.2 Interface standards	41
9.2 Conformance and interoperability testing	42
9.2.1 Conformance testing	42
9.2.2 Interoperability testing	42

Annex A (informative) SM-CG use cases	43
A.1 Introduction	43
A.2 Methodology	43
A.3 Table of use cases	44
Annex B (informative) Abbreviations and glossary of commonly used terms in smart metering	49
B.1 List of abbreviations	49
B.2 Glossary of commonly used terms - sources	51
B.3 Glossary of commonly used terms	52
Annex C (informative) Functional reference architecture for smart metering communications and configuration examples	63
Annex D (informative) Product standards related to additional functionalities	67
Annex E (informative) History	69
Figures	
Figure 1 — Smart metering in the context of smart grid and home automation	14
Figure 2 — Reference architecture diagram for smart metering communications	18
Figure 3 — Responsibilities for interface standardization co-ordination, in co-operation with other TCs	23
Figure 4 — The principle of conformance testing	42
Figure 5 — The principle of interoperability testing	42
Figure C.1 — Functional reference architecture for smart metering communications - as shown in 6.3, Figure 2	63
Figure C.2 — Configuration example (i) – no neighborhood network	64
Figure C.3 — Configuration example (ii) – no local network	65
Figure C.4 — Configuration example (iii) – Multiple meter communications via LNAP	66
Tables	
Table 1 — Existing communications standards and standards to be developed under the mandate	25
Table A.1 — Use cases	44

Foreword

This document (CEN/CLC/ETSI/TR 50572:2011) has been prepared by CEN/CENELEC/ETSI Smart Meters Coordination Group (SM-CG).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC [and/or CEN] shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under Mandate M/441 given to CEN, CENELEC and ETSI by the European Commission and the European Free Trade Association.
