EUROPEAN STANDARD

EN 13791

NORME EUROPÉENNE

EUROPÄISCHE NORM

January 2007

ICS 91.080.40

English Version

Assessment of in-situ compressive strength in structures and precast concrete components

Evaluation de la résistance à la compression du béton en place dans les structures et les éléments préfabriqués

Bewertung der Druckfestigkeit von Beton in Bauwerken oder in Bauwerksteilen

This European Standard was approved by CEN on 10 November 2006.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword.....	4
Introduction	5
1 Scope	7
2 Normative references	7
3 Terms and definitions	8
4 Symbols and abbreviations	9
5 Principles.....	10
6 Characteristic in-situ compressive strength in relation to compressive strength class	10
7 Assessment of characteristic in-situ compressive strength by testing of cores	11
7.1 Specimens	11
7.2 Number of test specimens.....	11
7.3 Assessment.....	11
7.3.1 General.....	11
7.3.2 Approach A.....	12
7.3.3 Approach B.....	12
8 Assessment of characteristic in-situ compressive strength by indirect methods.....	13
8.1 General.....	13
8.1.1 Methods	13
8.1.2 Alternative 1 – Direct correlation with cores	13
8.1.3 Alternative 2 – Calibration with cores for a limited strength range using an established relationship.....	14
8.2 Indirect tests correlated with in-situ compressive strength, (Alternative 1).....	14
8.2.1 Application	14
8.2.2 Testing procedure.....	14
8.2.3 Establishing the relationship between test result and in-situ compressive strength.....	14
8.2.4 Assessment of in-situ compressive strength.....	14
8.3 Use of a relationship determined from a limited number of cores and a basic curve, (Alternative 2)	15
8.3.1 General.....	15
8.3.2 Testing	15
8.3.3 Procedure	15
8.3.4 Validity of relationships	19
8.3.5 Estimation of in-situ compressive strength.....	19
8.4 Combination of in-situ strength test results by various test methods	19
9 Assessment where conformity of concrete based on standard tests is in doubt:.....	20
10 Assessment report	21
Annex A (informative) Factors influencing core strength.....	22
A.1 General.....	22
A.2 Concrete characteristics	22
A.2.1 Moisture content	22
A.2.2 Voidage	22
A.2.3 Direction relative to the casting	22
A.2.4 Imperfections	22
A.3 Testing variables.....	22
A.3.1 Diameter of core.....	22
A.3.2 Length/diameter ratio	23

A.3.3	Flatness of end surfaces	23
A.3.4	Capping of end surfaces.....	23
A.3.5	Effect of drilling	23
A.3.6	Reinforcement	23
Annex B	(informative) Factors influencing results by indirect test methods	24
B.1	Rebound hammer tests.....	24
B.2	Ultrasonic pulse velocity measurements.....	24
B.3	Pull-out tests	24
Annex C	(informative) Concepts concerning the relationship between in-situ strength and strength from standard test specimens	25
Annex D	(informative) Guidelines for planning, sampling and evaluation of test results when assessing in-situ strength	26
D.1	Planning.....	26
D.2	Sampling.....	26
D.3	Testing programme	26
D.4	Assessment	27
	Bibliography.....	28

EN 13791:2007 (E)

Foreword

This document (EN 13791:2007) has been prepared by Technical Committee CEN/TC 104 “Concrete and related products”, the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by July 2007, and conflicting national standards shall be withdrawn at the latest by July 2007.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.
