TECHNICAL SPECIFICATION
SPÉCIFICATION TECHNIQUE
TECHNISCHE SPEZIFIKATION

CEN/TS 15674

October 2007

ICS 13.040.40

English Version

**Air quality - Measurement of stationary source emissions -
Guidelines for the elaboration of standardised methods**

Qualité de l'air - Mesure des émissions de sources fixes -
Lignes directrices pour l'élaboration de méthodes
normalisées

Luftbeschaffenheit - Messung von Emissionen aus
stationären Quellen - Leitlinien zur Erarbeitung von
standardisierten Verfahren

This Technical Specification (CEN/TS) was approved by CEN on 18 September 2007 for provisional application.

The period of validity of this CEN/TS is limited initially to three years. After two years the members of CEN will be requested to submit their comments, particularly on the question whether the CEN/TS can be converted into a European Standard.

CEN members are required to announce the existence of this CEN/TS in the same way as for an EN and to make the CEN/TS available promptly at national level in an appropriate form. It is permissible to keep conflicting national standards in force (in parallel to the CEN/TS) until the final decision about the possible conversion of the CEN/TS into an EN is reached.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (CEN/TS 15674:2007) has been prepared by Technical Committee CEN/TC 264 "Air quality", the secretariat of which is held by DIN.

This document has been prepared by WG 19 "Emissions monitoring strategy" of CEN/TC 264 as one of three basic documents on measurements of stationary source emissions consisting of:

- EN 15259, *Air quality — Measurement of stationary source emissions — Requirements for measurement sections and sites and for the measurement objective, plan and report*
- CEN/TS 15674, *Air quality — Measurement of stationary source emissions — Guidelines for the elaboration of standardised methods*
- CEN/TS 15675, *Air quality — Measurement of stationary source emissions — Application of EN ISO/IEC 17025:2005 to periodic measurements*

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to announce this Technical Specification: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

Introduction

This European Technical Specification provides guidance to assist with the five years periodical revision of European Standards prepared by CEN/TC 264 and when drafting new standards. It is designed to ensure that the revised standards and new standards, when used with or without reference to accreditation

- are appropriate technical references giving no rise to significant misunderstandings and/or significant differences of interpretation by technical auditors and/or by testing laboratories,
- are consistent one with another regarding definitions and general aspects as well as with the general structure of emission measurement programmes as addressed in EN 15259,
- are consistent one with another in view of combined measurements of several measured components at the same time in the framework of a measurements programme and
- are in accordance and properly linked with CEN/TS 15675 and EN 15259.

It is considered that such significant differences, misunderstandings and/or inconsistencies would, on the one hand, impair the quality and comparability within the European Union of data produced according to those European emission measurement standards and on the other hand, result in unfair competition among European laboratories in the field of emission measurements.

This document can be applicable to other air quality fields.
