TECHNICAL REPORT
RAPPORT TECHNIQUE
TECHNISCHER BERICHT

CEN/TR 1295-3

July 2007

ICS 23.040.01

English Version

Structural design of buried pipelines under various conditions of loading - Part 3: Common method

Calcul de résistance mécanique des canalisations enterrées sous diverses conditions de charge - Partie 3:
Méthode commune

Statische Berechnung von erdverlegten Rohrleitungen unter verschiedenen Belastungsbedingungen - Teil 3:
Einheitliches Berechnungsverfahren

This Technical Report was approved by CEN on 11 July 2005. It has been drawn up by the Technical Committee CEN/TC 165.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Contents

	Page
Foreword.....	6
Introduction	7
1 Scope	9
2 References.....	9
3 Structural design issues	9
3.1 Soils	9
3.2 Pipe materials.....	11
3.3 Types of loading	11
3.3.1 Soil load	11
3.3.2 Traffic load.....	11
3.3.3 Groundwater.....	11
3.3.4 Installation loads.....	11
3.3.5 Internal pressure.....	11
3.3.6 Pipes own weight.....	12
3.3.7 Weight of fluid	12
3.3.8 Subsidence (differential settlement).....	12
3.3.9 Temperature differences	12
3.3.10 Landslide	12
3.3.11 Loading by earthquake	12
4 Principles used in Annex A (Option 1) and Annex B (Option 2).....	13
4.1 General.....	13
4.2 Principles used in Annex A (Option 1)	13
4.2.1 Introduction	13
4.2.2 Information on the content of Annex A (Option 1)	13
4.3 Principles used in Annex B (Option 2)	16
5 Synopsis	18
Annex A Structural design of buried pipelines - Option 1.....	21
A.1 General.....	21
A.2 Terms and definitions	21
A.3 Symbols	25
A.4 Principle	31
A.5 Installation conditions	33
A.5.1 Geometric parameters.....	33
A.5.2 Construction procedures	33
A.5.3 Influencing parameters	34
A.5.4 Selection of embedment type.....	35
A.6 Initial loads	39
A.6.1 Soil load	39
A.6.2 Surface loads	41
A.6.3 Traffic loads.....	43
A.6.4 Seismic actions	47
A.6.5 Other loads	48
A.7 Soil parameters	48
A.7.1 Soil groups	48
A.7.2 Soil properties	48
A.7.3 Soil pressure ratio	54
A.8 Load distributions.....	55
A.8.1 General.....	55

A.8.2	Distribution in circumferential direction	56
A.8.3	Load concentration factors	62
A.9	Loads acting on the pipe	68
A.9.1	General	68
A.9.2	Vertical direction	69
A.9.3	Horizontal direction	70
A.10	Internal pressure	75
A.10.1	General	75
A.10.2	Internal working pressure	75
A.10.3	Internal surge pressure	75
A.11	Pipe deflection	76
A.11.1	General	76
A.11.2	Vertical deflection	76
A.11.3	Horizontal deflection	79
A.12	Analysis of bending moments, normal forces, stresses and strains	80
A.12.1	General	80
A.12.2	Bending moments and normal forces	80
A.12.3	Stresses and/or strains	85
A.13	Longitudinal effects	95
A.14	Stability analysis (only required for flexible pipes)	95
A.14.1	Imperfections	95
A.14.2	Stability analysis with buckling and snap through loads	96
A.15	Calculated factors of safety from the design procedure and analysis	100
A.15.1	General	100
A.15.2	Circumferential direction	100
A.15.3	Longitudinal direction	103
A.16	Minimum factors of safety and failure probability	103
A.16.1	Principles	103
A.16.2	Safety factors against load bearing failure	103
A.16.3	Safety against inadmissible large deflections	104
A.16.4	Safety against failure in case of not predominantly static load	104
	Annex AA Classification of soils	105
	Annex AB Factors of safety and failure probability	106
	Annex AC Soil mechanics background on soil moduli	107
	Annex AD General remarks on stability analyses for buried pipes	110
	Annex AE Finite element analysis	112
	Annex AF Detailed notes relative to longitudinal effects	113
	Annex AG Flowchart and worked examples	114
	Annex B Structural design of buried pipelines - Option 2	128
B.1	General	128
B.2	Terms and definitions	128
B.3	Symbols	131
B.4	Principle	134
B.5	Pipe parameters	135
B.5.1	Dimensions	135
B.5.2	Elastic properties	135
B.5.3	Pipe ring stiffness	135
B.5.4	Pipe characteristics figures	136
B.6	Installation conditions and related calculation parameters	136
B.6.1	Introduction	136
B.6.2	Soil classification	137
B.6.3	Embedments and beddings	137
B.6.4	Compaction	138
B.6.5	Calculation parameters	140
B.7	Stiffness criterion	143

CEN/TR 1295-3:2007 (E)

B.8	Loadings	143
B.8.1	General.....	143
B.8.2	Soil vertical pressure due to fill	144
B.8.3	Vertical pressure due to service loads.....	147
B.8.4	Total vertical pressure p_V (due to fill and service loads)	149
B.8.5	Horizontal pressure p_H due to fill and service loads	149
B.8.6	Pressure due to external water pressure p_{we}	149
B.8.7	Action due to self weight	149
B.8.8	Force due to water weight	149
B.9	Load and interaction pressure distributions	149
B.9.1	General.....	149
B.9.2	Loads distribution.....	150
B.10	Buckling	151
B.11	Ring deflection	152
B.12	Bending moments, axial forces, stresses and strains.....	153
B.12.1	Bending moments.....	153
B.12.2	Axial forces.....	154
B.12.3	Strains	154
B.12.4	Stresses	154
B.13	Verification of safety in use	155
B.13.1	Definition of the limit states.....	155
B.13.2	Verification with respect to ultimate limit state	156
B.13.3	Verification with respect to serviceability limit states	158
B.13.4	Verification with respect to fatigue	159
B.13.5	Verification for pressure pipes	159
B.14	Summary of design procedures and relevant verifications	161
B.14.1	Choice of parameters used in the design method	161
B.14.2	Calculation of the actions	162
B.14.3	Calculation of the loads and deflections.....	163
B.15	Analysis of longitudinal effects.....	164
B.16	Analysis of seismic action.....	164
	Annex BA Classification of soils.....	165
	Annex BB Factors of safety and failure probability	166
	Annex BC Background on soil moduli	167
	Annex BD Rigid, semi-rigid and flexible pipes — A proposal for a definition of ranges of system behaviour.....	168
	Annex BE Background of the Marston method.....	175
	Annex BF Longitudinal effects — Notes of B.15	183
	Annex BG Worked examples	184
	Annex C Classification of soils	190
	Annex D Factors of safety and failure probability.....	193
D.1	Rudiments of the theory of probabilistic reliability.....	193
D.2	Analysis of reliability of buried piping systems	196
D.3	Scatter of parameters	196
D.4	Results of the analysis	196
	Annex E Longitudinal effects	197
E.1	Longitudinal effects	197
E.2	Failure behaviour due to longitudinal effects	197
E.3	Failure modes	197
E.3.1	General.....	197
E.3.2	Pipeline failure	198
E.3.3	Joint failure	198
E.3.4	Gradient loss	198
