## HARMONIZATION DOCUMENT

# HD 631.3 S1

# DOCUMENT D'HARMONISATION HARMONISIERUNGSDOKUMENT

July 2008

ICS 29.035.20; 29.060.20

English version

# Electric cables -Accessories -Material characterisation -Part 3: Fingerprinting for heat shrinkable components for medium voltage applications from 3,6/6 (7,2) kV up to 20,8/36 (42) kV

Câbles électriques -Accessoires -Caractérisation des matériaux -Partie 3: Essais d'identification des composants thermorétractables pour les applications moyenne tension de 3,6/6 (7,2) kV à 20,8/36 (42) kV Kabel und isolierte Leitungen -Garnituren -Materialcharakterisierung -Teil 3: Fingerprint-Prüfungen für wärmeschrumpfende Komponenten für Mittelspannungsanwendungen von 3,6/6 (7,2) kV bis 20,8/36 (42) kV

This Harmonization Document was approved by CENELEC on 2008-06-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for implementation of this Harmonization Document at national level.

Up-to-date lists and bibliographical references concerning such national implementations may be obtained on application to the Central Secretariat or to any CENELEC member.

This Harmonization Document exists in three official versions (English, French, German).

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

I.S. HD 631.3 S1 : 2008 - 2 -

HD 631.3 S1:2008

#### Foreword

This Harmonization Document was prepared by a task force under the direction of WG 11 of CENELEC TC 20, Electric cables.

As agreed at the Bruges meeting (June 2007), the text of the draft was submitted to the formal vote and was approved by CENELEC as HD 631.3 S1 on 2008-06-01.

The following dates were fixed:

-	latest date by which the existence of the HD has to be announced at national level	(doa)	2008-12-01
-	latest date by which the HD has to be implemented at national level by publication of a harmonized national standard or by endorsement	(dop)	2009-06-01
-	latest date by which the national standards conflicting with the HD have to be withdrawn	(dow)	2011-06-01

HD 631 will have 4 parts:

- Part 1: Fingerprinting and type tests for resinous compounds
- Part 2: Fingerprinting and type tests for heat shrinkable components for low voltage applications
- Part 3: Fingerprinting for heat shrinkable components for medium voltage applications from 3,6/6 (7,2) kV up to 20,8/36 (42) kV
- Part 4: Fingerprinting for cold shrinkable components for low and medium voltage applications up to 20,8/36 (42) kV

Fingerprinting of sealant components which are delivered as non heat shrinkable items, but that have an important interfacing role, is under consideration.

NOTE It has been assumed in the preparation of this document that the execution of its provisions will be entrusted to appropriately qualified and experienced people, for whose use it has been produced.

WARNING This Harmonization Document calls for the use of substances and/or procedures that may be injurious to health if adequate precautions are not taken. It refers only to technical suitability and does not absolve the user from legal obligations relating to health and safety at any stage.

#### 1 Scope

This Harmonization Document specifies the test methods and requirements for fingerprinting (as defined in 3.12) of heat shrinkable components intended to be used in cable accessories for medium voltage, as defined in HD 629.1 and HD 629.2.

Fingerprinting of materials does not have a mandatory link to type testing of accessories. It shall be regarded as a stand-alone test, but may be carried out in combination with the accessory type tests.

Component basic functions can be: conductive, stress control or stress grading, insulating, oil barrier, anti-tracking, external protection and sealing. Components are supplied as single layer items or as multi-layer items.

NOTE Information on health and safety is given in Annex A.

#### **2** Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

HD 629.1	Test requirements on accessories for use on power cables of rated voltage from 3,6/6 (7,2) kV up to 20,8/36 (42) kV - Part 1: Cables with extruded insulation	
HD 629.2	Test requirements on accessories for use on power cables of rated voltage from 3,6/6 (7,2) kV up to 20,8/36 (42) kV - Part 2: Cables with impregnated paper insulation	
EN ISO 1183 series	Plastics - Methods for determining the density of non-cellular plastics (ISO 1183 series)	
EN ISO 11358	Plastics - Thermogravimetry (TG) of polymers - General principles (ISO 11358)	
IEC 60050-461	International Electrotechnical Vocabulary (IEV) - Chapter 461: Electric cables	
ISO 11357-3	Plastics - Differential scanning calorimetry (DSC) - Part 3: Determination of temperature and enthalpy of melting and crystallization	

#### 3 Terms and definitions

For the purposes of this document, the following terms and definitions apply together with those given in IEC 60050-461.

#### 3.1

#### heat shrinkable

property of a polymeric component previously expanded to recover to its original shape when heated above an appropriate temperature

#### 3.2

#### heat shrinkable components

expanded polymeric extruded tubings or moulded parts (single or multi-layer), which undergo thermally activated recovery when heated
