## Alarm systems - Social alarm systems - Part 3: Local unit and controller

**I.S. EN 50134-3:2012&AC:2015**

*Incorporating amendments/corrigenda/National Annexes issued since publication:*

EN 50134-3:2012/AC:2015

The National Standards Authority of Ireland (NSAI) produces the following categories of formal documents:

I.S. xxx: Irish Standard — national specification based on the consensus of an expert panel and subject to public consultation.

S.R. xxx: Standard Recommendation — recommendation based on the consensus of an expert panel and subject to public consultation.

SWiFT xxx: A rapidly developed recommendatory document based on the consensus of the participants of an NSAI workshop.

*This document replaces/revises/consolidates the NSAI adoption of the document(s) indicated on the CEN/CENELEC cover/Foreword and the following National document(s):*

*NOTE: The date of any NSAI previous adoption may not match the date of its original CEN/CENELEC document.*

*This document is based on:*

EN 50134-3:2012

*Published:*

2012-04-27

*This document was published under the authority of the NSAI and comes into effect on:*

2015-07-23

Corrigendum to EN 50134-3:2012

English version

---

**4.2.3 Inputs - Input signals from trigger devices:**

In b), replace the word "dedicated" by "applicable" to read:

"For wire free trigger devices using a radio interconnection, without managed spectrum access only radio frequencies applicable to social alarm systems shall be used for the transmission of alarm and fault conditions."

This European Standard was approved by CENELEC on 2012-03-12. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## Foreword

This document (EN 50134-3:2012) has been prepared by CLC/TC 79 "*Alarm systems*".

The following dates are fixed:

- latest date by which this document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2013-03-12
- latest date by which the national standards conflicting with this document have to be withdrawn (dow) 2015-03-12

This document supersedes EN 50134-3:2001.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC [and/or CEN] shall not be held responsible for identifying any or all such patent rights.

The EN/TS 50134 series will consist of the following parts, under the general title "Alarm systems - Social alarm systems":

- Part 1: System requirements,
  - Part 2: Trigger devices,
  - Part 3: Local unit and controller,
  - Part 4 (free),
  - Part 5: Interconnections and communications,
  - Part 6 (free),
  - Part 7: Application guidelines.
-

## **Introduction**

This standard specifies the minimum requirements for the local unit and controller to ensure this system part provides the functionality and reliability required by a social alarm system.

The design should also take into consideration situations where the user may be unable to send an alarm, or where an unwanted alarm may be sent, due to technical malfunctions or poor ergonomic design.

## 1 Scope

This European Standard specifies the minimum requirements and tests for local units and controllers forming part of a social alarm system.

This European Standard applies to local units and controllers that receive an alarm triggering signal from manually or automatically activated trigger devices and convert this into an alarm signal for transmission to the alarm receiving centre or an alarm recipient.

The local unit and controller may be either separate units or integrated into one unit.

## 2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
