I.S. EN ISO 8330:2014

Rubber and plastics hoses and hose assemblies - Vocabulary (ISO 8330:2014)

I.S. EN ISO 8330:2014

Incorporating amendments/corrigenda/National Annexes issued since publication:

The National Standards Authority of Ireland (NSAI) produces the following categories of formal documents:

I.S. xxx: Irish Standard — national specification based on the consensus of an expert panel and subject to public consultation.

S.R. xxx: Standard Recommendation — recommendation based on the consensus of an expert panel and subject to public consultation.

SWiFT xxx: A rapidly developed recommendatory document based on the consensus of the participants of an NSAI workshop.

This document replaces/revises/consolidates the NSAI adoption of the document(s) indicated on the CEN/CENELEC cover/Foreword and the following National document(s):

NOTE: The date of any NSAI previous adoption may not match the date of its original CEN/CENELEC document.

This document is based on:

Rubber and plastics hoses and hose assemblies - Vocabulary (ISO 8330:2014)

Tuyaux et flexibles en caoutchouc et en plastique -
Vocabulaire (ISO 8330:2014)

Gummi- und Kunststoffschläuche und Schlauchleitungen -
Vokabular (ISO 8330:2014)

This European Standard was approved by CEN on 7 May 2014.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Foreword.....	3
----------------------	----------

Foreword

This document (EN ISO 8330:2014) has been prepared by Technical Committee ISO/TC 45 "Rubber and rubber products" in collaboration with Technical Committee CEN/TC 218 "Rubber and plastics hoses and hose assemblies" the secretariat of which is held by BSI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by February 2015, and conflicting national standards shall be withdrawn at the latest by February 2015.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN ISO 8330:2008.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Endorsement notice

The text of ISO 8330:2014 has been approved by CEN as EN ISO 8330:2014 without any modification.

ISO 8330:2014(E/F)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: Foreword - Supplementary information

The committee responsible for this document is ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 1, *Rubber and plastics hoses and hose assemblies*.

This third edition cancels and replaces the second edition (ISO 8330:2007), which has been technically revised.

In particular, the following have been revised:

- a number of hose terms (see [2.1](#)) have been added and several definitions have been amended (see [2.1](#));
- the following terms have been added:
 - [2.1.8](#) bending (of a hose);
 - [2.1.48](#) flexibility (of a hose);
 - [2.1.50](#) flexural stiffness (of a hose);
 - [2.1.52](#) hardwall hose;
 - [2.1.59](#) hose deformation;
 - [2.1.89](#) nominal size.
- a part of [2.1.7](#) bend radius has been deleted;
- [2.1.30](#) conductivity has been amended;
- Annex A has been deleted and reference is made to Annex A of ISO 8031:2009 instead (see [Clause 1](#) and [2.1.30](#), Note 1).

Rubber and plastics hoses and hose assemblies — Vocabulary

1 Scope

This International Standard defines terms used in the hose industry.

This International Standard is divided into two subclauses, namely

- [2.1](#): hose terms, and
- [2.2](#): hose assembly terms.

NOTE 1 The following hose terms can also be applied to hose assemblies: bend radius, bending, bending force, burst pressure, elongation, hydrostatic stability, hydrostatic stability test, impulse test, kinking, maximum working pressure, minimum bend radius, proof pressure, proof pressure test, reeling diameter, test pressure, vacuum resistance, vacuum stability, vacuum test, working pressure, working temperature.

Recommended terminology and limits for electrical resistance, according to construction, of rubber and plastics hoses and hose assemblies for International Standards and European Committee for Standardization (CEN) standards can be found in ISO 8031:2009, Annex A.

NOTE 2 See also the ISO online browsing platform (OBP): <https://www.iso.org/obp/ui/>

2 Terms and definitions

2.1 Hose terms

2.1.1

adhesion

strength of bond between cured rubber surfaces or between a cured rubber surface and a non-rubber surface or the strength of bond between two non-rubber (plastics) hose layers fused or glued together

2.1.2

angle of braid

angle of lay

acute angle between any strand of the *braid* ([2.1.17](#)) and a line parallel to the axis of the hose

2.1.3

anti-static wire

bonding wire

conducting wire

metal wire (usually manufactured from thin braided copper wires) incorporated in the *hose wall* ([2.1.60](#)) in order to remove static electricity generated in the hose, and usually connected to the *couplings* ([2.2.10](#)) of an assembly

2.1.4

armoured hose

hose ([2.1.58](#)) with a protective covering, generally applied as a *braid* ([2.1.17](#)) or *helix* ([2.1.54](#)), to minimize physical damage

2.1.5

armouring

protective covering over a hose, generally applied as a *braid* ([2.1.17](#)) or *helix* ([2.1.54](#)) to prevent mechanical damage or to support the *reinforcement* ([2.1.109](#)) of a hose section
