Irish Standard Recommendation
S.R. CEN/TS 16835-2:2015

Molecular in vitro diagnostic examinations -
Specifications for pre-examination processes
for venous whole blood - Part 2: Isolated
genomic DNA

S.R. CEN/TS 16835-2:2015

Incorporating amendments/corrigenda/National Annexes issued since publication:

The National Standards Authority of Ireland (NSAI) produces the following categories of formal documents:

I.S. xxx: Irish Standard — national specification based on the consensus of an expert panel and subject to public consultation.

S.R. xxx: Standard Recommendation — recommendation based on the consensus of an expert panel and subject to public consultation.

SWiFT xxx: A rapidly developed recommendatory document based on the consensus of the participants of an NSAI workshop.

This document replaces/revises/consolidates the NSAI adoption of the document(s) indicated on the CEN/CENELEC cover/Foreword and the following National document(s):

NOTE: The date of any NSAI previous adoption may not match the date of its original CEN/CENELEC document.

This document is based on:

CEN/TS 16835-2:2015

Published:

2015-10-14

This document was published under the authority of the NSAI and comes into effect on:

2015-11-02

National Foreword

S.R. CEN/TS 16835-2:2015 is the adopted Irish version of the European Document CEN/TS 16835-2:2015, Molecular in vitro diagnostic examinations - Specifications for pre-examination processes for venous whole blood - Part 2: Isolated genomic DNA

This document does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with this document does not of itself confer immunity from legal obligations.

In line with international standards practice the decimal point is shown as a comma (,) throughout this document.

TECHNICAL SPECIFICATION

CEN/TS 16835-2

SPÉCIFICATION TECHNIQUE

TECHNISCHE SPEZIFIKATION

October 2015

ICS 11.100.30

English Version

Molecular in vitro diagnostic examinations - Specifications for pre-examination processes for venous whole blood - Part 2: Isolated genomic DNA

Tests de diagnostic moléculaire in vitro - Spécifications
relatives aux processus pré-analytiques pour le sang
total veineux - Partie 2: ADN génomique extrait

Molekularanalytische in-vitro-diagnostische Verfahren
- Spezifikationen für präanalytische Prozesse für
venöse Vollblutproben - Teil 2: Isolierte genomische
DNS

This Technical Specification (CEN/TS) was approved by CEN on 31 August 2015 for provisional application.

The period of validity of this CEN/TS is limited initially to three years. After two years the members of CEN will be requested to submit their comments, particularly on the question whether the CEN/TS can be converted into a European Standard.

CEN members are required to announce the existence of this CEN/TS in the same way as for an EN and to make the CEN/TS available promptly at national level in an appropriate form. It is permissible to keep conflicting national standards in force (in parallel to the CEN/TS) until the final decision about the possible conversion of the CEN/TS into an EN is reached.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Contents	Page
European foreword	3
Introduction	4
1 Scope	5
2 Normative references	5
3 Terms and definitions	5
4 General considerations	7
5 Outside the laboratory	7
5.1 Primary venous whole blood collection manual	7
5.1.1 Information about the primary sample donor	7
5.1.2 Selection of the venous whole blood collection tube by the laboratory	8
5.1.3 Primary venous whole blood sample collection from the patient and stabilization procedures	8
5.1.4 Information on the primary blood sample and storage requirements at the blood collection facility	8
5.2 Transport requirements	9
6 Inside the laboratory	10
6.1 Primary sample reception	10
6.2 Storage requirements	10
6.3 Isolation of the genomic DNA	11
6.3.1 General	11
6.3.2 Using commercial kits	12
6.3.3 Using the laboratories own protocols	12
6.4 Quantity and quality assessment of isolated genomic DNA	12
6.5 Storage of isolated genomic DNA	13
Annex A (informative) Impact of preanalytical workflow steps on venous whole blood genomic DNA quality	14
A.1 General information on operated experiments in Annex A	14
A.2 Influence of preanalytical variables (blood storage duration and temperature, and DNA isolation methods) on genomic DNA integrity	14
A.3 Influence of blood storage time on the genomic DNA integrity	15
A.4 Influence of genomic DNA integrity on an analytical test based on long PCR amplicons	17
A.5 Influence of blood storage conditions on the performance of PCR tests based on short amplicons	18
Bibliography	20
